**1-TOPIC**

The candidate should specify the significance of the thesis topic for current and future research in the field, explain the reason for choosing that particular topic, and define the essential terms related to the research topic.

**2-PURPOSE/IMPORTANCE**

The candidate should specify the purpose of the proposed research, the project's significance and its contribution to the field, and the hypotheses to be tested by the project.

**3-FIELD, RESOURCES, PLACE-DURATION AND SUPPORT**

The candidate should explain in which field the project will be completed; whether the project is applied or not; if applied, which kind of sampling and data collection instruments will be used. Additionally, they should specify the place where the study will be carried out, and the permissions required. If survey and similar studies are needed, they should be mentioned under this heading. The estimated completion time, how the costs will be financed and whether the project is sponsored or not should be specified.

**4-METHODS AND TECHNIQUES**

The candidate should specify the stages of the project, which techniques will be used to form the theoretical and practical stages of the project, which sampling techniques will be used for sampling the data and how (using which techniques) the data will be evaluated.

**5-THESIS OUTLINE**

The candidate should specify the main titles and subtitles related to the topic and prepare a tentative "CONTENTS" section.

**RESOURCES AND APPENDICES**

The candidate should give a list of scholarly resources including books, articles etc.
