Detaylı bilgi için; cocukuniversitesi.aydin.edu.tr

- Budget approval is awaited for the prepayment request within the scope of our project "Future Classes, Future Teachers" supported by ISTKA.
- Within the scope of TÜBİTAK 4005 - Innovative Educational Practices program, an application was made for the "Block Coding and Argumentation Based STEAM Activities for Preschool Teachers" project.
- As part of the Aydın Digital Education Platform project, 7,000 cards were distributed to high school students across Turkey. Within the scope of the project, Medicine and Engineering Applications courses were planned for high school students, and the trainings were carried out online.

- Transformation in Higher Education: Blended Learning Model on the E-University Path-BAP project continues
- Application has been made to TÜBİTAK 4005, Block Coding and Argumentation Based STEAM Activities for Preschool Teachers project.
- EU project -Partnership for Excellence - Erasmus+ Teacher Academies project preparation has started.
- KA210-SCH - Small-scale partnerships in school education-STEM+A (Storytelling)-The process continues as a researcher.

- A support education unit was established in our university within the scope of the "My School Understands Me, Supports My Talent with the Support Education Room" Project, which was carried out in 2016 with the cooperation of Istanbul Aydın University Faculty of Education and Istanbul Aydın Children's University. Children's University carries out group training of gifted students by using various laboratories and classrooms of our university. During the applications, it was observed that the students who had problems in group education due to social inadequacies, accompanied by problems such as giftedness and superiority, as well as attention deficit and hyperactivity, social inadequacies and behavioral disorders, needed individual support. In this direction, our support education unit in the G block has started to work on individual support of students with such problems with the support of special education specialists.
