## Corporate Governance and Sustainability Symposium (8 May 2019)

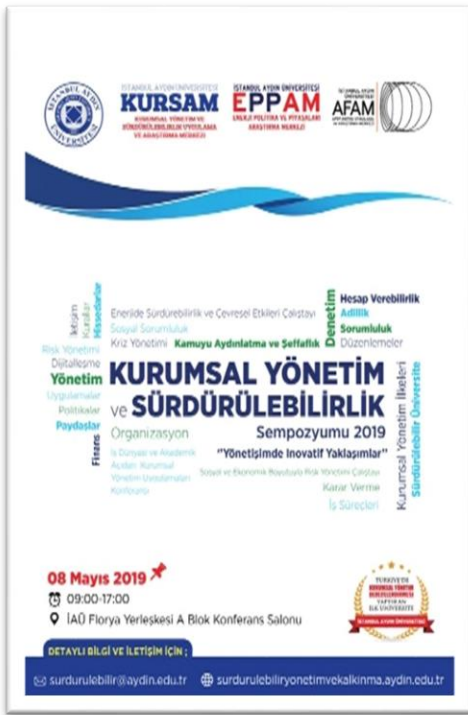

Istanbul Aydın University (IAU) Disaster Training Application and Research Center (AFAM), Corporate Governance and Sustainability Application and Research Center and Energy Policies and Markets Application and Research Center (EPPAM) on May 8, 2019, we will hold the "Corporate Governance and Sustainability Symposium".

The symposium, which will be held with the theme of "Innovative Approaches in Governance" and will include experts in the field through both the Organizing Committee, the Scientific Committee and the papers, The concept of "sustainability", which has made great efforts to fulfill the requirements of today's world, will be addressed with the dimension of "corporate governance".

"Risk and Sustainable Finance Management in Social and Economic Dimension" was held on February 6, 2019, before the symposium, in order to examine in-depth the academic aspects of the topics to be discussed in the symposium and the impacts of the areas we consider as priority, On March 6, 2019, workshops will be held under the headings of "Energy Sustainability and Environmental Impacts" and the final texts to be prepared in line with the data obtained at the workshops will be declared at the symposium.

The dependency relationship between sustainability and corporate governance will be revealed, we believe that we will take an important step in fulfilling our responsibility towards the century we live in and the society we are a part of, with the symposium, where we aim to create a platform where current or potential problems regarding practices in this field and solution proposals for these problems will be discussed.

Academicians and experts who want to present papers at the symposium <http://surdurulebiliriyonitmvkalkinma.aydin.edu.tr/> The abstracts they have prepared in accordance with the "Abstract Writing Rules" on the website of the website until 29 March 2019 [surdurulebilir@aydin.edu.tr](mailto:surdurulebilir@aydin.edu.tr) must be sent to the address by e-mail.

## **The Workshop of Determination the National Shelter Policy**

In order to develop a shelter policy at the national level, with the workshop held in Antalya between 26 - 28 November 2018 under the coordination of the Republic of Turkey Ministry of Internal Affairs, Disaster Emergency Management Presidency (AFAD);

- To bring together representatives of relevant institutions and organizations,
- To identify existing and potential problems,
- Identifying solutions,
- To ensure that the relevant legislation is updated, and
- It is aimed to create a shelter policy suitable for our age.

Developing the methodology of the workshop, which we undertake as the consultancy of Istanbul Aydın University Disaster Training Application and Research Center we conducted moderator trainings and preparation of the workshop final report.

133 people from 55 directorates/departments from 35 different institutions attended the workshop held at the national level. As a result of the workshop, where discussions took place under 8 Chapters and 23 sub-titles, 12,747 data were presented for 38 different risks.

It is planned to continue with the work of the technical groups after the data obtained from the national shelter policy development workshop are shared.

## Intelligence, Dissemination, Warning and Alarm (IKAS) Workshop

Information Retrieval, Dissemination, Warning and Alarm (IKAS) Workshop it was held in Antalya on 29 and 30 November 2018 under the coordination of the Republic of Turkey Ministry of Internal Affairs, Disaster Emergency Management Presidency (AFAD). With the workshop;

- Developing and updating the Information Retrieval and Dissemination System in a way to include disaster hazards,
- Evaluation of current capacity,
- Leveraging stakeholders' knowledge and experience
- Determining the roadmap for establishing a modern system using new technologies and
- It is aimed to create a policy that will ensure national harmony and integrity.

As Istanbul Aydın University Disaster Training Application and Research Center, we also worked on the development of the methodology of the workshop, moderator trainings, and preparation of the workshop result report. As a result of the workshop, where discussions took place under 7 Chapters and 24 sub-titles, 11,045 data were presented for 47 different risks. It is planned that IKAS studies will continue with the work of technical groups after the data obtained from the workshop are shared.
