E-NEWSPAPER

Faculty of Dentistry

Prepared by the Faculty of Dentistry.

Istanbul Aydın University 4th National Young Dentists and Student Congress

The Istanbul Aydın University Faculty of Dentistry Young Dentists and Student Congress, which we held for the fourth time this year, was successfully organized with 850 participants, 14 speakers, and the support of 25 dental companies. We would like to thank everyone who participated, supported, and contributed to the congress.

**Assoc. Prof. Dr. Elçin
Bedeloğlu**
Department of Oral and
Maxillofacial Surgery

Assoc. Prof. Dr. Elçin Bedeloğlu, who served as the Chair of the Organizing Committee of our congress and successfully coordinated the seamless flow of the scientific program, contributed a valuable vision to our congress not only through her administrative leadership but also as an instructor.

The “Basic Implantology Course” delivered by Assoc. Prof. Dr. Bedeloğlu served as a comprehensive guide for dentists who aim to take their first steps in implant surgery and strengthen their clinical practice. Covering a wide range of topics, from fundamental surgical protocols to case planning, the course attracted great interest from the participants.

We extend our sincere thanks to our Organizing Committee Chair, Assoc. Prof. Dr. Elçin Bedeloğlu, for shaping the vision of our congress, contributing to its successful completion, and sharing her valuable knowledge with our participants.

**Assoc. Prof. Dr. Işıl Kaya
Büyükbayram**
Department of Endodontics

Assoc. Prof. Dr. Gizem Çolakoğlu
Department of Oral and Maxillofacial
Radiology

The importance of accurate diagnosis and radiological evaluation in the success of endodontic treatments was addressed in the multidisciplinary course jointly conducted by Assoc. Prof. Dr. Işıl Kaya Büyükbayram and Assoc. Prof. Dr. Gizem Çolakoğlu.

In the session titled “CBCT Practice in Endodontics Through Clinical Cases,” our instructors demonstrated how Cone Beam Computed Tomography (CBCT) technology can be effectively used in the management of complex endodontic cases. This hands-on training, carried out through real clinical cases, provided participants with new perspectives in diagnosis and treatment planning.

We would like to thank our esteemed instructors for enriching our congress by combining advancing technology with their clinical experience.

**Assoc. Prof. Dr. Cenker
Zeki Koyuncuoğlu**
Department of
Periodontology

The most critical and highly anticipated topics in surgical practice were addressed through two special interactive sessions delivered by Assoc. Prof. Dr. Cenker Zeki Koyuncuoğlu, both of which attracted great interest.

Our instructor first delivered his presentation titled “Complication-Free Implantology: Dream or Reality?,” which sought answers to questions frequently encountered by clinicians in their daily practice. Following this thought-provoking presentation, he conducted the course titled “Basic Suturing Techniques and Materials in Periodontology and Implantology,” focusing on manual skills and material knowledge that directly influence clinicians’ success in practice. We would like to thank our esteemed instructor for sharing with us the key principles of surgical success, proper material selection, and precise suturing techniques from both theoretical and practical perspectives.

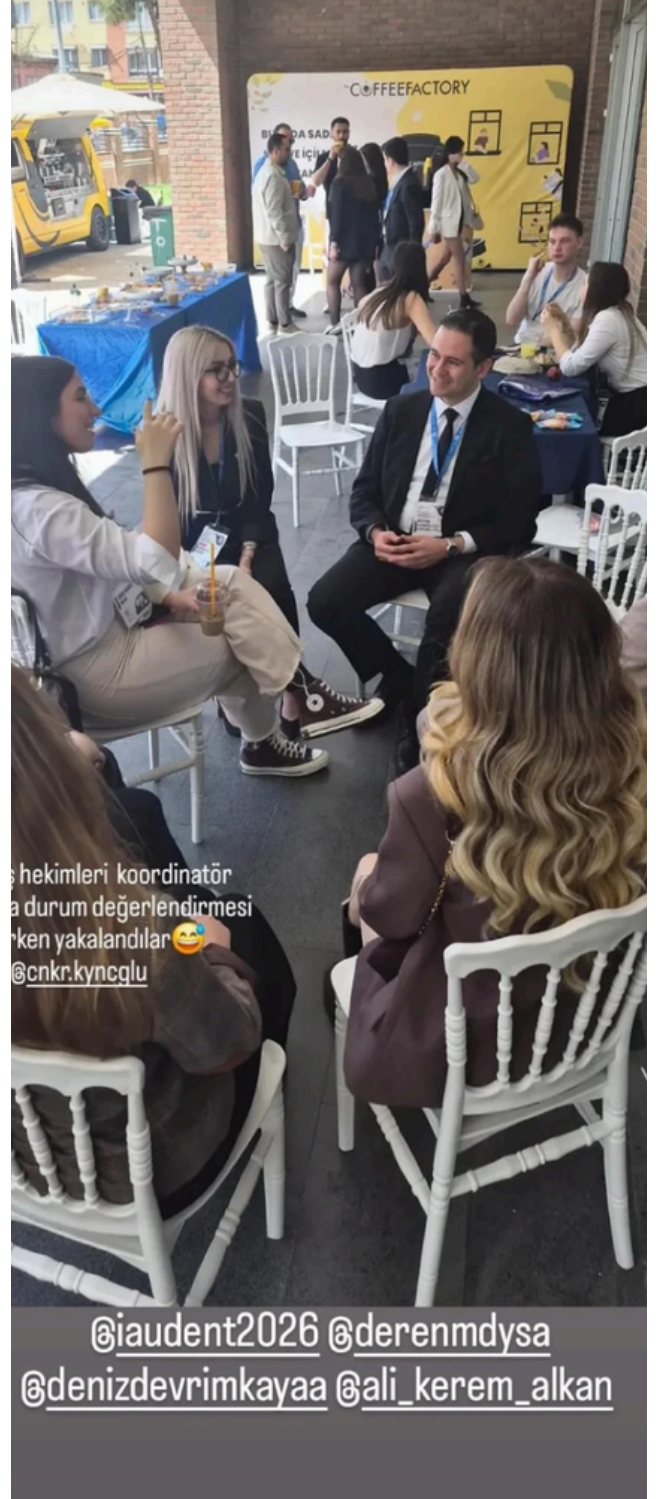

Asst. Prof. Dr. Sina Saygılı
Department of
Prosthodontics, Faculty of
Dentistry

Asst. Prof. Dr. Sina Saygılı from the Department of Prosthodontics addressed the clinical applications of modern technology in his session titled “Digital Workflow in Implant Placement: A Prosthetically Driven Approach.” This presentation, which highlighted the critical role of digital transformation and prosthetically driven planning in surgical success, provided participants with new perspectives in diagnosis and treatment planning. We would like to thank our esteemed instructor for enriching our congress by combining advancing technology with his clinical experience.

Highlights from Our Congress

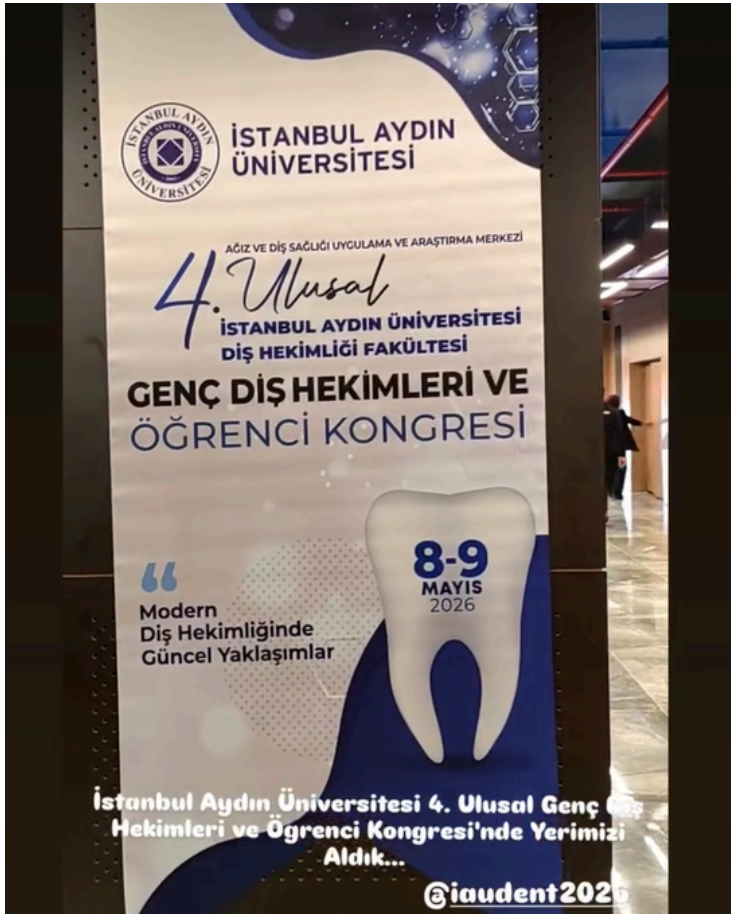

Throughout our congress, our fifth-year students, Hazar Hüseyin Bulut and Asya Ecesi Aydın, served as presenters and made valuable contributions to the event.

We congratulate our dear students, who successfully guided the flow of the congress with their stage performance and energy, and represented our faculty in the best possible way.

Course

Prof. Dr. Korkud Demirel

Department of
Periodontology

Prof. Dr. Burak Çankaya

Department of Oral and Maxillofacial
Surgery, Faculty of Dentistry

Prof. Dr. Korkud Demirel, a faculty member of our Department of Periodontology, and Prof. Dr. Burak Çankaya from the Department of Oral and Maxillofacial Surgery at Istanbul University Faculty of Dentistry conducted the “Basic Implant Surgery” course for doctoral students of the Department of Periodontology on April 29, 2026.

Course

This comprehensive course, which combined theoretical training with clinical practice stages, was highly beneficial in strengthening the surgical foundations of our young colleagues. We would like to extend our sincere thanks to our esteemed professors, who made a significant contribution to our educational process by sharing their clinical experience and valuable expertise with our students.

Conferences

Prof. Dr. Hasan Sabri Meriç

Department of
Periodontology

Prof. Dr. Sabri Hasan Meriç, Head of the Department of Periodontology at our Faculty, and Prof. Dr. Mustafa Tunaya, Head of the Department of Biophysics at our University's Faculty of Medicine, came together with students at Bülent Akarcalı Anatolian High School in Üsküdar, Piri Reis Anatolian High School in Bahçelievler, Hasan Polatkan Anatolian High School in Bakırköy, and Uğur College in Sefaköy.

Introducing the departments and professions to high school students, our professors opened a window into the worlds of medicine and dentistry, guiding young students in their career planning and future goals.

We extend our sincere thanks to our esteemed professors for sharing our university's vision with younger generations through these highly attended events and inspiring them for the future.

Thesis Defenses

Department of Periodontology

Gökçe Yaşa, one of the doctoral students and research assistants of our Faculty's Department of Periodontology, successfully completed the defense of her doctoral thesis conducted under the supervision of Prof. Dr. Korkud Demirel on May 20.

Thesis Defenses

Department of Endodontology

Katia Stoicefidis and Elif Müge Topaktaş, who have been continuing their academic studies within our Faculty's Department of Endodontology, have successfully completed their thesis defenses. We wholeheartedly congratulate our colleagues, who have successfully concluded this important milestone in their academic journey and contributed to science. We would also like to thank all our faculty members who supported them throughout this process, and wish our young academicians continued success in their academic careers filled with valuable contributions to science.

On June 10, 2026, the “Zero Waste in Dentistry: Quiz Competition Event” was held at Istanbul Aydın University Esenyurt Campus as part of Zero Waste Week. The event was attended by our faculty students, academic and administrative staff, as well as our patients. Interactive informative sessions and educational activities were organized on clinical waste management, environmental awareness, and sustainability.

İAÜ MEZUNLAR Buluşması

Aydınlık bir *geleceğe*

17 HAZİRAN 2026
ÇARŞAMBA
Saat 18:00 - 21:00 arasında
“İAÜ Mezunlar Buluşması”
gerçekleştirilecektir.

Bu buluşmada; mesleğimizi konuşmak,
genç meslektaşlarımızın sorunlarını
gözden geçirmek, geleceğe yönelik
fikir ve önerilerinizi almak amacıyla
bir araya geliyoruz.

Sizleri de aramızda görmekten
mutluluk duyarız.

Katılım sağlayacakların bilgilerini
form üzerinden iletmeleri
rica olunur.

IAU ALUMNI Meeting

Towards a *brighter future*

17 JUNE 2026
WEDNESDAY
The “IAU Alumni Meeting”
will be held between
18:00 - 21:00.

In this meeting; we come together
to talk about our profession, review
the challenges faced by young
colleagues, and gather your ideas
and suggestions for the future.

We would be delighted
to see you among us.

We kindly ask all participants
to submit their information
via the online form.

Birlikte daha güçlüyüz.

Stronger together.

The “IAU Alumni Gathering,” organized by Istanbul Aydın University Faculty of Dentistry and the Oral and Dental Health Research and Application Center, was held on Wednesday, June 17, 2026. Held under the motto “We Are Stronger Together,” this meaningful event addressed professional topics, discussed the challenges faced by our young colleagues, and provided an opportunity to share ideas and suggestions for the future.

Community Oral, Dental and Environmental Health

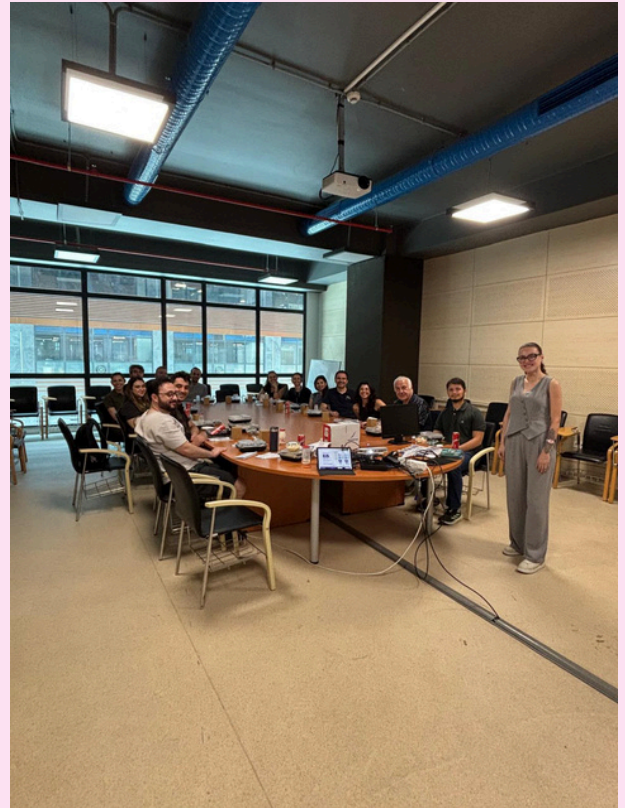

Events

Faculty members and doctoral students of our Faculty's Department of Periodontology came together at the Glimo event held on June 18. During this productive meeting, which took place on the -2 floor of our Faculty, detailed information was provided about Glimo's next-generation toothpaste formulations and current oral care products. The role of product ingredients in preventive oral health practices, their contribution to periodontal care processes, and their areas of use in daily oral hygiene protocols were also discussed.

Etkinlikler

Faculty members and doctoral students of our Faculty's Department of Periodontology came together at an informative meeting held in collaboration with Sensodyne on June 30. At the event, which took place in Classroom 1117 of T Block at our Faculty, the etiology of dentin hypersensitivity, clinical evaluation processes, and current care approaches that can be applied to patients with sensitivity complaints were discussed. Comprehensive information was shared on the areas of use of Sensodyne products in sensitivity management, patient recommendations, and their integration into daily oral care routines.
