Dr. Elif Kaya: "Bu tablo, 'düzensizlikten' ziyade bir geçiş döneminin belirsizliğini yansıtıyor. Tarihsel olarak hegemonik güç değişimleri, kuralların askıya alındığı, ittifakların yeniden şekillendiği ara dönemlere yol açar. Yaşadığımız süreci yeni bir küresel düzenin doğum sancıları olarak okumak daha doğru."

#### ÖZ

Bu araştırmanın amacı, Orta Doğu'daki İnsan Kaynakları (İK) İşe Alma Uzmanları arasında Yapay Zeka (YZ) farkındalığı düzeyini ve bunun iş performansı ve iş güvensizliği üzerindeki etkisini değerlendirmek ve ayrıca iş güvensizliğinin bu ilişkide bir aracı görevi görüp görmediğini araştırmaktır. Araştırmada, değişkenler arasındaki hem doğrudan hem de aracılık eden ilişkileri değerlendirmek için 344 İK İşe Alma Uzmanından toplanan veriler üzerinde korelasyon, ANOVA ve regresyon testleri yapılmıştır. Analizlerde SPSS 21 programı tercih edilmiştir. Bulgular, iş performansının YZ farkındalığı ile negatif, iş güvensizliği ile pozitif bir korelasyonu olduğunu göstermektedir. Araştırmada, YZ farkındalığının iş güvensizliği üzerinde pozitif bir etkisi olduğu ve iş güvensizliğinin YZ farkındalığı ile iş performansını arasındaki ilişkiyi kısmen aracılık ettiği görülmüştür. Bu bulgular, YZ farkındalığının İK İşe Alma Uzmanlarının iş güvensizliği ve iş performansını üzerindeki etkilerine ilişkin araştırma alanına değerli içgörüler sağlanmakta ve katkıda bulunmaktadır.

#### ABSTRACT

The scope of the present research is to evaluate the level of Artificial Intelligence (AI) awareness among Human Resources (HR) Recruiters in the Middle East and its impact on their job performance and job insecurity, besides to explore whether job insecurity represents as a mediator in this relationship. The research used correlation, ANOVA, and regression tests on data collected from 344 HR Recruiters to assess both direct and mediating relationships between the variables. SPSS 21 program was preferred in the analyses. The findings indicate that job performance had a negative correlation with AI awareness and a positive correlation with job insecurity. AI awareness was found to have a positive effect on job insecurity, and job insecurity was shown to partially mediate the relationship between AI awareness and job performance. This study provides valuable insights and contributes to the field of research on the effects of AI awareness on HR Recruiters' job insecurity and job performance.

#### 1. Introduction

Today, one of the most transformative aspects of artificial

intelligence in the scope of human resources is talent acquisition management and recruitment processes (Parasa, 2024; Jovanovic, 2025). Recruitment is the mechanism of
