U.S. Sanctions on Iran's Economy and Its Subsequent Effects on Trade Relations Between Türkiye and Iran

Morteza OJAGHLOU* & Elif KAYA**

Abstract

This paper examines the long-run and dynamic effects of international sanctions on Iran and their implications for bilateral trade between Türkiye and Iran. Using quarterly data for the period 2002–2024, the study employs the Autoregressive Distributed Lag (ARDL) bounds testing approach and the Dynamic Conditional Correlation GARCH (DCC-GARCH) model to capture both structural relationships and time-varying dependencies between sanctions intensity and trade flows. The findings show that sanctions have a significant and persistent negative impact on Türkiye's trade balance with Iran, mainly through financial restrictions, disrupted payment channels, and rising transaction costs. At the same time, the analysis reveals Türkiye's adaptive capacity to sustain trade through alternative mechanisms such as local-currency settlements, barter arrangements, and regional trade corridors. While Türkiye's imports from Iran—largely dominated by energy products—remain relatively stable, non-energy exports appear much more sensitive to sanction shocks, resulting in asymmetric trade dynamics. The extended ARDL results further indicate that oil prices and exchange-rate movements play an important role in shaping bilateral trade, particularly by influencing import values and export competitiveness. The DCC-GARCH findings demonstrate that the relationship between sanctions and trade is not constant over time, but fluctuates in response to major geopolitical developments, especially the 2012–2015 sanctions tightening, the implementation and subsequent weakening of the Joint Comprehensive Plan of Action (JCPOA), and later sanction renewals. Overall, the results suggest that sanctions do not completely suppress bilateral trade; rather, they restructure it, pushing both countries toward more informal, adaptive, and regionally integrated trade patterns.

Keywords: Sanctions, Iran Economy, Türkiye-Iran Trade Relations, ARDL Bounds Test, Dynamic Conditional Correlation (DCC), International Economic Policy, Geopolitics.

Batı'nın iklim politikası söylemi son yirmi yılda köklü bir dönüşüm geçirdi. Bir zamanlar "kalkınma hakkı" olarak görülen kavram, bugün "karbon yükümlülüğü" kisvesi altında gelişmekte olan ülkelerin önünde bir engel olarak durmaktadır. Bu dönüşümün iki temel aracı var: 2015 tarihli Paris **İklim** Anlaşması ve onun ticari uzantısı olan Karbon Sınır Düzenleme Mekanizması (CBAM). Her ikisi de yüzeysel okumada evrensel sorumluluk çerçevesine oturtulmuş; derinlemesine incelendiğinde ise asimetrik güç ilişkilerini pekiştiren araçlar olarak karşımıza çıkmaktadır.

Uluslararası politikada güç yalnızca füze, savaş uçağı, enerji kaynakları veya ordunun büyüklüğüyle ölçülmez. Bir devletin gerçek kapasitesi, ağır krizler karşısında kurumlarını çalıştırabilmesi, karar alma süreçlerini sürdürebilmesi, toplumu mobilize edebilmesi ve rakiplerinin hesaplarını değiştirebilmesiyle de anlaşılır.

Bu nedenle Ayetullah Seyyid Ali Hamaney'in cenaze törenini sadece dini bir merasim veya büyük bir lidere veda olarak değerlendirmek yetersiz kalır. Bu tören aynı zamanda İran devletinin Hamaney sonrasında nasıl yol alacağı sınıdığı büyük bir siyasi olaydı.

Tarih boyunca imparatorlukların çöküşü sahnelendiğinde, gözler hep savaş alanlarına çevrilmiştir. Kartaca'nın düşüşünde Roma lejyonlarının kılıçları, Napolyon'un sonunda Waterloo'nun çamurlu tarlaları, İngiltere'nin gerileyişinde ise Süveyş'in kaybı ilk akla gelenlerdir. Ancak yirmi birinci yüzyılın jeopolitik destanı yazılırken, tarihçilerin en çok üzerinde duracağı kırılma noktası muhtemelen bir uçak gemisinin batışı ya da bir üssün boşaltılması olmayacaktır. Asıl deprem, görünmez bir coğrafyada, küresel finansal sistemin kalbinde gerçekleşiyor: Paranın, rezervlerin ve ödeme ağlarının mimarisinde yaşanan

Poverty alleviation with zakat-based redistribution model

Author: İhlas Sovbetov

Keywords: zakat; poverty; income inequality; welfare economics; OLG models

Abstract | References | Supplementary Materials

This article develops a dynamic zakat-based redistribution model within an overlapping-generations framework to examine domestic poverty alleviation. The model incorporates four endogenous income classes and formalises transfers from surplus-income individuals to economically vulnerable retirees and structurally poor groups. Zakat is evaluated against intergenerational, universal, and targeted poverty transfers under identical demographic structures and fiscal effort. Within the modelled framework, zakat outperforms alternative redistribution mechanisms. Its surplus-based structure targets absolute poverty while limiting fiscal pressure on near-threshold groups. It achieves the highest utility improvement-to-disruption ratio and generates pronounced reductions in income inequality and poverty depth under baseline conditions, with outcomes remaining robust across alternative macroeconomic and demographic environments. By formalising zakat as a surplus-conditioned redistribution rule, the article contributes a theoretical framework for evaluating targeted poverty alleviation under fiscal and administrative constraints. The findings offer policy-relevant design insights for reducing persistent poverty while preserving efficiency and social sustainability.

AVIATION MANAGEMENT (ENG) DEPARTMENT

Article

Asst.Prof.Dr. Vedat ULUSOY's article titled “From Translation to Theory: Cross-Cultural Adaptation and Validation of the Personal Brand Equity Scale for the Turkish Context” was published in June 2026 in the Pertanika Journal of Social Sciences and Humanities, a Scopus Q1 indexed journal.

The graphic is a vertical rectangular poster with a dark blue background and a subtle grid pattern. At the top left is the Istanbul Aydın University logo. To its right, the university's name is written in white. Below this, the text 'SCOPUS Q1' is prominently displayed in yellow. The article title, 'Makale Adı: From Translation to Theory: Cross-Cultural Adaptation and Validation of the Personal Brand Equity Scale for the Turkish Context', is written in white. Below the title, the journal name 'Dergi: Pertanika Journal of Social Sciences and Humanities' is listed. The index 'Indeks: SCOPUS Q1' and the publication date 'Yayın Tarihi: Haziran 2026' are also included. Two circular portraits of the authors are shown: Prof. Dr. İlkay KARADUMAN on the left and Dr. Öğr. Üyesi Vedat ULUSOY on the right. At the bottom, a purple button with a white cursor icon says 'Makale için Tıklayınız' (Click for the article), followed by the DOI link: 'DOI: https://doi.org/10.47836/pjssh.34.3.06'.
