## ABOUT US

The Children's Education Application and Research Center, one of the projects of the Istanbul Aydin University Faculty of Education, was officially established following its announcement in the Official Gazette dated Sunday, 10 February 2013. It aims to support students' development and to ensure that gifted and talented students are accepted by society, supported, and provided with the special education they need.

Within the framework of the Children's University, the Center carries out the following activities:

- Conducting identification and educational assessment of students,
- It offers enrichment programs for gifted and talented students during the fall and spring semesters, and organizes programs open to the participation of all students during the summer term.
- Providing pre-service teachers with opportunities to gain practical experience,
- Implementing academic and applied projects for gifted and talented students,
- Collaborating with universities and public and private institutions at national and international levels,

# MEETING

A meeting was held with the Habitat Association in collaboration with TEKMER to discuss potential joint studies and project opportunities.

# EDUCATION

Within the scope of the 2025-2026 Children's University Fall Semester:

- Workshop courses were planned,
- Instructor assignments for the workshops were completed,
- Course contents were finalized and material requests were submitted.

## MEETING

As part of the 2025–2026 Children's University Fall Semester activities, a meeting was held with Prof. Dr. Ahmet KURNAZ to plan counseling services for parents regarding child development, the educational process, and challenges encountered.

During the meeting, views were exchanged on the scope of counseling activities to be carried out in line with parents' needs and expectations, the implementation process, and potential activities to be conducted throughout the semester.

# EVENT

As part of Istanbul TEKNOFEST 2025, the Children's University participated in the event area and successfully conducted three different workshop programs aimed at supporting children's development in science, technology, and creativity.

Active student participation was ensured during the workshops, and hands-on activities enabling learning through enjoyment were implemented.

# CONGRESS

Asst. Prof. Dr. Şeyma ÖZDİL presented her paper entitled "An Examination of Digital Applications Developed for Students Diagnosed with Dyslexia and Dysgraphia" at the III International Conference on Learning Disabilities with International Participation.

The paper examined digital applications developed to support the academic skills of students diagnosed with learning disabilities, focusing in detail on their content, usage features, and educational contributions.

# EDUCATION

On 25 October 2025, the 2025-2026 Children's University Fall Semester Program commenced with the participation of 35 students and 19 mentors. The program, conducted under the guidance of expert mentors, aims to contribute to students' academic and social development.

# ORIENTATION PROGRAM

On 25 October 2025, an orientation program was organized for the parents of students participating in the 2025-2026 Children's University Fall Semester Program.

Within the scope of the program, parents were informed about the objectives of the Children's University, the educational content, the implementation process, and the roles of parents throughout the program.

The orientation aimed to support parents' active involvement in the process and to facilitate students' effective adaptation to the educational program.

# CONGRESS

Asst. Prof. Dr. Şeyma ÖZDİL presented her oral paper entitled "Language Education in the Family in the Light of Hilmi Ziya Ülken's Views" at the IV Turkish Education Congress, held at Yıldız Technical University between 27-29 November 2025.

# PARENT SEMINAR

On 29 November 2025, a parent education seminar entitled "Living with Gifted Children" was organized for the parents of students participating in the 2025-2026 Children's University Fall Semester Program, with the participation of Prof. Dr. Ahmet KURNAZ.

The seminar aimed to help parents better understand their children and support their educational processes more consciously, providing comprehensive information on the developmental characteristics of gifted and talented children.
