

Number 21 / August - September - October 2021

İSTANBUL AYDIN UNIVERSITY

CHILDREN'S UNIVERSITY

•Children's University Fall Term is carried out with "Archaeology, Art History, Cartoon and Animation, Artificial Intelligence, Yoga and Entrepreneurship and Innovation workshops on between 25 September – 11 December 2021

In the archeology workshop; It is aimed to teach children what the cultural heritage is, the details of the science of archeology and what kind of problems the smuggling of antiquities can cause. In addition, the science of archeology is explained to children by teaching what archeology is, how to study the past and how archaeologists work.

In the Art History workshop; The drawings of humans, animals and hunters made by the first humans during the periods when they lived together with the natural life are shown. In this way, science is studied by groaning everything that has been done up to the present time.

In the yoga workshop; The emphasis is on the child's self-knowledge and it is aimed that the child catches the harmony of the universe based on him/herself. Children are supported with Yoga, which has great benefits for the development of creativity and imagination.

In the Artificial Intelligence workshop; You will learn what artificial intelligence is and how it is used. It will be talked about how to implement it by making use of current technologies. Our artificial intelligence workshop consists of different activities and applications. Within the scope of the workshop; Many topics such as computer vision recognition (image processing, recognition), speech and comprehension (text-to-speech speech-to-text conversion), natural language processing (phonology, morphology, syntax, etc.), machine learning will be discussed.

In the Cartoon and Animation course, students will use the After Effect program to design a character, space and sound design for a 2D animated short film.

In the Entrepreneurship and Innovation workshop; It is aimed that children discover and develop their entrepreneurial skills through oral expression, animation, examples and games, with an emphasis on topics such as entrepreneurship, professions, innovative, creative and need-oriented thinking.

On September 8, 2021, a webinar called "Astronomy with Stories" was held with the participation of many institutions under the leadership of online astronomy.
