AYDIN AGENDA

1

IAU Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN, Chairman of the Digital Technologies Business Council of the Foreign Economic Relations Board (DEİK), DEİK Board Member and Founder of Cerebrum Tech Dr. R. Erdem Erkul and his team discussed the digitalization processes of universities.

AYDIN AGENDA

2

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN attended the General Assembly Meeting of the Committee on Cooperation of Euro-Mediterranean Local and Regional Authorities (COPPEM).

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN met with the Metropolitan of Tarabya Apostol Daniilidis and his friends.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN delivered a speech at the conference on “Innovative Leadership in Education: Building the Education System of the Future” hosted by Azerbaijan State Pedagogical University. In his speech, he emphasized that the transformation in education is possible not only through technological innovations but also through leadership vision.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN met with Prof. Dr. Cafer Caferov, Rector of Azerbaijan State Pedagogical University and EURAS Board Member.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN participated in the workshop titled “Internationalization, Research and Quality Management in Global Universities: Strategic Approaches Towards Sustainable Development Goals” with the participation of education leaders.

AYDIN AGENDA

7

Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, visited Türkiye - Azerbaijan University.

AYDIN AGENDA

8

Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, visited Prof. Dr. Vilayet Valiyev, Rector of Azerbaijan Technical University and University of Turkiye- Azerbaijan.

Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, attended the VI International Turkic World Science and Engineering Congress during his visit to Azerbaijan Technical University.

Professor Mustafa Aydın ADPU-da təhsildə innovativ liderlikdən danışdı

**“Türkiyəli tələbələrin Qarabağ universitetində təhsil almasını çox istəyirik”
– Mustafa Aydın**

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN's visit to Azerbaijan and his press statement were widely covered in the Azerbaijani press.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN visited the Founding Rector of Odlar Yurdu University, Prof. Dr. Ahmed Valiyev during his visit to Azerbaijan.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN met with Istanbul Aydın University graduates during his visit to Azerbaijan.

Istanbul Aydın University
Chairman of the Board of
Trustees Prof. Dr. Mustafa
AYDIN gave an interview before
the EURAS Workshop. In his
speech, he made important
evaluations on
internationalization, research
and quality management in
higher education and
sustainable development goals.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN came together with educational consultancy firms to ensure that Azerbaijani students can receive education at international standards and meet with well-established universities in Türkiye and TRNC.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN attended the Higher Education Council Consultation Meeting.

Prof. Dr. Hızır Tarık Oğuzlu, Dean of Istanbul Aydın University Faculty of Science and Letters, was the guest of the December meeting of Istanbul Aydın University Aydın Policies Platform.

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN evaluated the Strategic Action Plan at the meeting developed by Küçükçekmece City Council.

Istanbul Aydın University Chairman of the Board of Trustees, Prof. Dr. Mustafa AYDIN published an interview in which he made important evaluations about the developments in the franchise sector and the food and beverage sector.

2025'TE 70 MİLYAR DOLARI HEDEFLEYEN

FRANCHISE SEKTÖRÜNDE YERELİN GÜCÜ ARTIYOR

Franchise sektörü, sürdürülebilirlik ve dijitalleşme odaklı büyüme stratejileriyle 2025'te 70 milyar dolarlık bir pazar büyüklüğüne ulaşmayı hedefliyor. Zincir işletmelerin yüzde 80'inin gıda alanında olduğunu söyleyen UFRAD Franchising Derneği Genel Başkanı Prof. Dr. Mustafa Aydın, Türkiye'de yeme-içme sektörünün özellikle yerel lezzetlere olan talebi ve franchise markalarının dinamik yapısının avantajını kullandığını söyledi.

2024 yılında yaşanan ekonomik zorlukları göz önünde bulundurduğumuzda yeme-içme pazarı bu yıl nasıl bir büyüklüğe ulaştı, franchise sektörü burada nasıl bir pazar payına sahip? 2025 yılına ilişkin franchise sektörüne yönelik büyüme öngörüleriniz nedir?

Türkiye'de gıda, franchising algısı en yüksek sektör olarak karşımıza çıkıyor. Zincir işletmelerin yüzde 80'inin gıda olduğu ifade ediliyor. Ekonomik zorluklara rağmen, 2025 yılı itibarıyla franchise sektörünün 70 milyar dolarlık bir büyüklüğe ulaşacağını öngörüyoruz. Gıda sektörü ise bu pazarın yaklaşık yüzde 30'luk oranını kapsamaktadır. Franchising sektörü, hızla değişen dünyamızda her geçen gün yeni dinamiklerle karşılaşılıyor. 2025 yılında da, bu değişimin en belirgin iki unsuru sürdürülebilirlik ve dijitalleşme olacaktır. Sürdürülebilirlik ve dijitalleşmenin entegrasyonu, franchising sistemlerini geleceğe hazırlıyor. Sürdürülebilir iş uygulamaları ile dijital teknolojileri bir araya getiren markalar, geleceğin iş dünyasında kalıcı olacaklardır. Özellikle yapay zeka tabanlı müşteri hizmetleri, veri analitiği ile pazarlama stratejileri geliştirme ve dijital ödeme sistemleri franchise dünyasında öncelikli konular arasında yer alıyor.

UFRAD olarak, sektörün büyümesine öncülük etmeye ve girişimcilerle markalar arasında güçlü bir köprü oluşturmaya devam edeceğiz. Bu doğrultuda, Türkiye'nin en büyük fuarcılık firması TÜYAP ile iş birliği içinde 5-8 Şubat 2025 tarihlerinde TÜYAP Fuar ve Kongre Merkezi'nde düzenleyeceğimiz Franchise İstanbul Expo 2025'te yeni iş fırsatlarını gündeme taşıyacak ve sektörün daha geniş bir kitleye ulaşmasına katkı sağlayacağız. Fuarda, yurt dışına açılmak isteyen markalar için büyük bir fırsat sunarak, birçok uluslararası yatırımcıyı bir araya getireceğiz. Bu etkinlik, global ölçekteki büyüme hedeflerini gerçekleştirmek isteyen yerli ve yabancı girişimciler için önemli bir platform olacak. Böylece, hem yerel hem de uluslararası pazarda güçlü bir etki yaratmayı amaçlıyoruz.

Yeme-içme sektöründe bu kadar çok markanın yer alması nasıl bir rekabet ortamı doğuruyor, bu markaların rekabete katkısı konusunda neler söylersiniz?

Yeme-içme sektörü, Türkiye'nin en dinamik ve hızlı büyüyen alanlarından biri olarak, yüzlerce markanın faaliyet gösterdiği büyük bir rekabet ortamına sahip. Bu rekabet, sektörün gelişimine önemli katkılar sağlıyor ve tüketicilere daha fazla seçenek sunarken markaların da kendilerini sürekli yenilemesini gerektiriyor.

Rekabet ortamının en önemli çıktılarından biri, kalite standartlarının yükselmesi ve markaların yenilikçilikle ön plana çıkma çabasıdır. Tüketicilerin artan beklentileri doğrultusunda markalar, hem ürün kalitesinde hem de müşteri deneyiminde iyileştirmeler yapıyor. Özellikle sağlıklı menüler, sürdürülebilir ambalajlar ve dijitalleşme gibi yenilikçi çözümler bu rekabetin doğrudan bir sonucudur. Bir diğer önemli katkı, fiyat avantajı ve tüketiciye sunulan çeşitliliiktir. Markalar, daha geniş bir kitleye ulaşmak için hem uygun fiyatlı hem de farklılaştırılmış ürünler sunmaya çalışıyor. Bu durum, tüketiciler açısından daha fazla alternatifin doğmasına olanak tanıyor. Ayrıca, franchise sistemlerinin sektördeki rolü, bu rekabetin düzenlenmesine

Istanbul Aydın University Chairman of the Board of Trustees Prof. Dr. Mustafa AYDIN and Tarık Sönmez, Director General of International Trade in Services at the Ministry of Trade, attended the December meeting of the Education Services Committee of the Service Exporters' Association.

Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, participated in the Education Services Sector Agency Workshop organized by the Service Exporters' Association, bringing together universities and agencies.

Dr. Osman Gültekin, Professor of Political Science and International Relations, Deputy Director of International Relations and UNESCO Chair in Cultural Diplomacy, Governance and Education at Istanbul Aydın University, was awarded the Presidential Award for Service and Excellence and Certificate of Appreciation by the Society of Transnational Academic Researchers (STAR Scholars Network).

Istanbul Aydın University Management, Founding Foundation AKEV management, Club Advisors and Clubs Union Students came together at the Clubs Union 1st Group Motivation Meeting. At the meeting, the fall semester, in which 100 clubs carried out over 700 social activities, was evaluated. Spring semester strategies and projects were explained.

The 2024 Sports Awards ceremony, organized in cooperation with the Faculty of Sports Sciences and Torex Sport, brought together the important names of the sports world. The ceremony started with the opening speeches of Prof. Dr. Ali Sınağ, Vice Rector of IAU and Prof. Dr. Kemal Tamer, Dean of the Faculty of Sports Sciences, and valuable names of the sports community received their awards.

2024 sports awards, Bursa Metropolitan Mayor Mustafa Bozbey and TRT Sports team visited IAU Information Center.

In collaboration with our Women's Studies Coordinatorship and our founding foundation AKEV, a workshop titled “Beauty Norms Towards the Female Body and Urban Safety: Beyond Spatial and Aesthetic Boundaries” was organized.

The project titled “Investigation of the Effect of Motor Imagery Ability on Upper Extremity Functionality and Proprioception in Transradial Amputees Using Myoelectric Prosthesis”, which was conducted by Lecturer Ayşe Yazgan from Department of Orthopedic Prosthetics and Orthotics, was entitled to be supported by TUBİTAK. We congratulate our academician and wish him continued success.

ABSTRACT

Designing new compounds from existing chemotherapeutic drugs to enhance inhibitory effects on tumor cells while overcoming multidrug resistance is one of the important strategies for new drug discovery in medicinal chemistry. A new series of urea and thiourea derivatives based on Lenalidomide as potential anticancer agents have been designed and synthesized. *In vitro* anticancer activity assay against Caki cancer cells and HUVEC endothelial cells revealed that 1-(4-methylphenyl)-3-[2-(2,6-dioxopiperidin-3-yl)-1-oxoisindolin-4-yl]urea (**11**) exhibited the highest anticancer activity and selectivity in the series with IC₅₀ values of 9.88 and 179.03 µM, respectively. Among the compounds, **11** showed significant HDAC1 inhibition of 68.02 ± 2.44% at 10 µM concentration. TGF-β, Bax, Bcl-2 protein levels and scratch assay were analyzed in Caki cells. As a result, compound **11** induced apoptosis in Caki cells. In this study, it has been demonstrated that compound **11** can be a lead compound for further detailed investigation in renal cancer treatment. Through molecular docking studies, it was determined that the most active compound, **11**, forms stable interactions with key residues in the enzyme's active site, particularly engaging in hydrogen bonds with GLY149 and coordinating with the zinc ion in the HDAC1 active site. These interactions are crucial for the observed inhibitory activity. Molecular dynamics simulation revealed the binding event of the most active compound with class I histone deacetylase and the stability of the complex in a biological environment.

2021hanifiozsanli@gmail.com

A hydrazide-hydrazone derivative, (E)-N'-(2-hydroxybenzylidene)-2-((3-(trifluoromethyl)phenyl)amino)benzohydrazide, was synthesized and characterized using various spectroscopic techniques such as FTIR, ¹H-NMR and ¹³C-NMR spectroscopy, and X-ray diffraction. The compound crystallized in the monoclinic space group P2₁/n, with lattice parameters: *a* = 21.0586(8) Å, *b* = 8.1969(3) Å, *c* = 21.6475(10) Å, and β = 92.886(2)°.

Within a single crystal cell, two crystallographically independent asymmetric molecules are present. These molecules are chemically identical but display a non-planar geometric molecular structure. The crystal structure was stabilized by C–H...O and C–H...N hydrogen bonds, which facilitate intermolecular interactions that form a three-dimensional network. The presence of effective hydrogen bond donors and acceptors contribute to the formation of a tightly interconnected three-dimensional structure. Additionally, Hirshfeld surface analysis was conducted to examine potential hydrogen bonding and spatial arrangement of atoms. This analysis quantified hydrogen bond interaction and identified atoms likely to participate in such interactions. Alongside stabilization by strong hydrogen bonds, π ... π interactions significantly influence the packing arrangement, with interactions among the phenyl rings observable through shape index and curvedness diagrams.

9.1 INTRODUCTION

Biomedical applications refer to the use of advanced technologies and scientific principles in the field of medicine and healthcare to enhance diagnostics, treatment, and overall understanding of biological processes. These applications span a wide range of areas, including medical imaging, genomics, bioinformatics, drug development, and personalized medicine. The integration of biomedical applications has revolutionized the healthcare industry, providing clinicians and researchers with powerful tools to diagnose diseases earlier, tailor treatments to individual patients, and uncover novel insights into the complexities of human biology [1–3].

The importance of biomedical applications lies in their potential to significantly improve patient outcomes and contribute to the advancement of medical knowledge. For instance, medical imaging technologies, such as magnetic resonance imaging (MRI) and computed tomography (CT), enable non-invasive visualization of internal structures, aiding in the early detection and accurate diagnosis of various conditions. Genomic technologies allow for the analysis of an individual's genetic makeup, facilitating the identification of genetic predispositions to diseases and informing personalized treatment plans. Biomedical applications not only enhance clinical practice but also drive innovation in drug discovery and development, paving the way for more targeted and effective therapies [4–6].

17.1 Introduction

17.1.1 Sustainability of Biosensors

The sustainability of biosensors over conventional analytical methods represents a significant leap forward in the field of analytical chemistry, environmental monitoring, and healthcare. Biosensors, owing to their unique characteristics, offer a myriad of advantages that align with the principles of sustainability. One of the primary sustainability features of biosensors is their ability to reduce sample volumes. Conventional methods often require larger quantities of samples for analysis, contributing to resource depletion and increased waste generation. Biosensor

Analysis of Participant Achievement in the 0-72 Months Child Development Course Program: Impact of Age, Education Level, Employment Status, and Reasons for Choosing the Course

Umut Birkan Özkan¹

Abstract

This study aims to examine how demographic factors of the participants affect their achievement in completing the 0-72 Months Child Development Course Program. Success in this context is defined by participants' ability to meet the course objectives, which focus on enhancing knowledge and skills in early childhood development. The study employs a quantitative, correlational survey design, with a research population consisting of 681 trainees enrolled in the program during the 2019-2020 academic year. The 0-72 Months Child Development course curriculum prepared by the Ministry of National Education General Directorate of Lifelong Learning was applied to the participants. Data were analyzed using a binary logistic regression model. In the first stage, the individual effects of each demographic variable on course success were examined. In the second stage, the combined impact of those variables found to have a significant effect was assessed. The analysis revealed that participants who were unemployed and those aged 30-39 had a higher likelihood of successfully completing the course. However, participants' purpose of attending the course and their education level did not have a significant effect on the likelihood of being successful in the course. The results of the study were discussed and recommendations were made.

Tom Stoppard is known for his wittily constructed high comedies of ideas that touch on a wide array of topics from science to philosophy, from aesthetics to politics, and from history to chaos theory or mathematics. What makes them “Stoppardian” is their allusive and parodic tone, witty wordplays, very articulate characters, multi-layered structures and their special representation of multiple perspectives. Considering their complexity and intellectually demanding quality, one could almost call them “caviar for the general public” as Carr said of James Joyce’s work in *Travesties*.¹ Contrary to popular belief, Stoppard, like Joyce, has succeeded in becoming one of

SIR JOHN FALSTAFF: SHAKESPEARE'S MULTIDIMENSIONAL ANTIHERO

Öz Öktem¹

¹Faculty Member, English Language and Literature Department, Istanbul Aydın University, Turkey

Abstract

In this paper I explore the multidimensional character of Sir John Falstaff, one of Shakespeare's most iconic figures, who appears in *Henry IV, Part 1*, *Henry IV, Part 2*, and *The Merry Wives of Windsor*. Falstaff, a blend of comical antihero and tragic figure, challenges traditional ideals of heroism, honor, and masculinity through his wit, cowardice, and self-indulgence. His lighthearted but intricate friendship with Prince Hal reveals significant contrasts in their values, emphasizing Falstaff's role as both mentor and foil in Hal's journey from a reckless youth to a responsible king. Falstaff's comical misadventures in *The Merry Wives of Windsor* feature his blundering attempts at courtship and underline the strength and agency of the women who ultimately outwit him. While his humor and charm make him a beloved character, Falstaff's actions also prompt reflection on themes of loyalty, leadership, and social norms. I argue that Falstaff's complex character serves not only as comic relief but also as a critical lens through which Shakespeare examines the nuanced tensions between individual desires and societal expectations in early modern English culture.

7440 sayılı Kanunla İhdas Edilen Ek Vergi, Hukuki Güvenlik İlkesi, Geçmişe Yürümezlik İlkesi, Mali Güç İlkesi, Eşitlik İlkesi

ÖZET

6 Şubat 2023'de Kahramanmaraş merkezli on bir ilimizde yaşanan depremlerden sonra 12 Mart 2023 tarihinde yürürlüğe giren 7440 sayılı Kanun'unun 10. maddesinin 27. fıkrası ile istisna, indirim ve indirimli kurumlar vergisinden yararlanan kurumlar vergisi mükelleflerine yönelik ek vergi ihdas edilmiştir. 2022 hesap dönemi bittikten sonra bazı kurumlar vergisi mükelleflerine yönelik getirilen ek verginin; geçmişe yürümezlik ve dolayısıyla hukuki güvenlik ilkesine, bazı vergisel bağışıklıklar üzerinden kurum kazancıyla ilişkilendirilmeksizin alınması mali güç ilkesine, bazı istisna ve indirimler üzerinden alınmasının ise eşitlik ilkesine aykırılık teşkil edip etmediği mükellefler açısından büyük önem taşımaktadır. Bu kapsamda çalışmanın amacı, 7440 sayılı Kanun kapsamında ihdas edilen ek vergi düzenlemesinin hukuki güvenlik, mali güç ve eşitlik ilkeleri açısından incelenmesi ile Anayasa Mahkemesinin bu konu hakkında vermiş olduğu ilgili kararın değerlendirilmesi üzerinedir. Çalışmada, Anayasa Mahkemesi kararlarından yararlanılmıştır.

7440 sayılı Kanun ile ihdas edilen ek vergi düzenlemesinin gerçek bir geçmişe yürüme olduğu tespitiyle, hukuki güvenlik ilkesine aykırılık teşkil ettiği sonucuna varılmıştır. Ek verginin dönem kazancıyla ilişkilendirilmeksizin alınması, zararı olan mükelleflerden de vergi alınabileceği sonucunu doğuracağından bu durum, mali güç ilkesine aykırılık teşkil etmektedir. Ayrıca bazı istisna ve indirimlerin ek verginin kapsamına alınması yoluyla yapılan sınıflandırmanın eşitlik ilkesine de aykırı olduğu ifade edilebilir. Deprem ülkesi olduğumuz gerçeğinden hareketle başta yaşanabilecek depremler ve bunun yanında iklim krizine bağlı olarak tarım alanında meydana gelebilecek sorunlar ile karşılaşılabilecek salgın hastalıklara karşı yatırım bütçeleri artırılarak önleyici tedbirler alınması elzemdir.

The workshop titled “The Roles of Local Governments and NGOs in Individual Preparedness for Disasters”, organized in cooperation with the Department of Public Relations and Publicity, Beylikdüzü Municipality, AKEV and AFAM, was held on Thursday, December 19, 2024 in the form of a closed session with the participation of nearly 200 expert participants from 12 universities, 24 non-governmental organizations and 14 district municipalities. The opening speeches of the program were delivered by Mahmut HERSANLIOĞLU, Deputy Governor in Charge of Disasters, Mehmet Murat ÇALIK, Mayor of Beylikdüzü, Prof. Dr. İbrahim Hakkı AYDIN, Rector of Istanbul Aydın University and Prof. Dr. Haluk ÖZENER, Director of Istanbul DED.

ÖZ

Dijital medya ağıнын gelişmesiyle birlikte video içeriği pazarının dağıtımı ve tüketimi internet tabanlı platformlara doğru bir büyüme göstermiştir. Dünya çapında en büyük çevrimiçi video akış platformlarından biri olan YouTube, geleneksel yayın ortamının aksine kullanıcıların çevrimiçi video içeriği oluşturmaya, yüklemesine ve izlemesine olanak tanıyan yapıya sahiptir. Bu özelliği sayesinde çeşitli tür ve nitelikte, içerik üreticisinin kendi denetiminde olan ve içeriği tamamen kendisinin oluşturduğu siyasi ve güncel olaylarla ilgili video içeriklerinin tüketimi hızla artmaktadır. Bu çalışma, bireylerin siyasi ve güncel olaylarla ilgili Youtube kanallarını kullanma motivasyonlarını tespit etmek ve motivasyonlar arasında nasıl bir ilişki olduğunu ortaya koymak amacıyla yürütülmüştür. Nicel araştırma yöntemlerinden anket tekniğinin kullanıldığı araştırma sonucunda, bireylerin YouTube'ta siyasi ve güncel içerikli kanalları kullanma motivasyonlarının sırasıyla medya uygunluğu, bilgi arama, siyasal hiciv eğlencesi ve psikolojik istikrar olduğu ortaya çıkmıştır. Motivasyonlar arasında anlamlı bir ilişki olduğu, yüksek eğitilmiş bireylerin psikolojik istikrar motivasyonunun daha düşük olduğu, gençlerin ve genç yetişkinlerin kanalları takip etme motivasyonlarının daha yüksek olduğu sonucuna ulaşılmıştır. Bu yönüyle çalışmanın dijital medya ve siyasal iletişim alanında yürütülen çalışmalara yol gösterici olacağı öngörülmektedir.

Anahtar Kelimeler: Dijital Medya, YouTube, Siyasi ve Güncel İçerikler, Kullanım ve Doyumlar Teorisi, Siyasal İletişim.

ABSTRACT

With the development of the digital media network, the distribution and consumption of the video content market has grown towards internet-based platforms. YouTube, one of the largest online video streaming platforms worldwide, has a structure that allows users to create, upload and watch online video content, unlike traditional broadcast media. Thanks to this feature, the consumption of video contents of various types and qualities related to political and actual events, which are under the control of the content producer and whose content is created entirely by herself, is rapidly increasing. This study was conducted to determine individuals' motivations for using YouTube channels related to political and actual events and to reveal what kind of relationship there is between motivations. As a result of the research using the survey technique, it was revealed that individuals' motivations for using political and actual content channels on YouTube are convenience of the media, pursuit of information, entertainment of political satire and mental stability, respectively. It was concluded that there is a significant relationship between motivations, that highly educated individuals have lower mental stability motivation, and that young people and young adults have higher motivation to follow the channels. In this respect, it is anticipated that the study will guide studies carried out in the field of digital media and political communication.

DELEUZE VE GUATTARI'NİN KISKAÇLARI ARASINDA: THE LOBSTER

BURCU KAVAS*

Giriş

Platon'un bilinen diyaloglarından biri olan *Şölen*'de arzu, aşkın gücü ve insanların aşka borçlu oldukları şeyler üzerine konuşan Aristophanes, aşkı anlayabilmek için çok eski zamanlara bakmak gerektiğini söyler. Ona göre (Platon, 2018: 65-72):

Çok eski zamanlarda insanlar; güneşin çocukları (biyolojik erkek), dünyanın çocukları (biyolojik kadın) ve ayın çocukları (*hermafrodit*) olarak dünyaya gelmekteydi. Ayın çocukları, güneşin ve dünyanın çocuklarından farklı olarak yuvarlak bir vücuda, dört ele, dört ayağa, ikiye üreme organına, iki yüze sahipti. Bu insanlar güçlerini tanrılara saldırmak için kullanıp bunun sonucunda tanrıların tanrısı Zeus tarafından cezalandırılırlar. Zeus onlara varlıklarını yok etmeyecek ama aynı zamanda da eskisi gibi davranamayacakları bir ceza verir; onları ikiye ayırarak güçsüzleştirir. Bu cezanın ardından bu insanlar birbirlerine sarılarak tek bir canlı olabilmek ve iyileşebilmek için aç ve hareketsiz şekilde beklerler.

ABSTRACT

This chapter explores how artificial intelligence can contribute to the production of visual cultural values and how we can collaborate with AI more effectively and creatively by adapting rug motifs that have existed since the early second millennium BC. The reproduction of these rug symbols with contemporary values acts, in a sense, as a revival of the Anatolian rug language. Generative AI tools have the potential to revolutionize representation and visualization through their ability to interpret and generate visual content. Rug motifs are powerful symbols of female identity, productivity, and creativity, especially in cultures where rug weaving is traditionally a female-dominated craft. By addressing issues of gender inequality and adapting these cultural symbols to the present through AI collaboration, this study seeks to rediscover and recontextualize women's creative spirit within the framework of the modern world. Additionally, it aims to explore AI's contributions and limitations in creating cultural visuals through human-AI interaction.

FİLM ELEŞTİRİSİ DERSİNİ ALAN ÖĞRENCİLERİN ELEŞTİRİ YAZIM KAZANIMLARININ DEĞERLENDİRİLMESİ

Burhan KILIÇ¹

Öz

1950'li yıllarda üniversiteler çatısı altında Fransa'da eğitimi verilmeye başlanan film eleştirisi ülkemizde Muhsin Ertuğrul'un Pençe filmi için yazmış olduğu eleştiri yazısından itibaren uzun bir süre gazetelerin güdümünde film tanıtım faaliyetlerine yakın bir çizgide kalmıştır. Ülkemizde süreç içerisinde film eleştirisini bu çizgiden kurtarmak ve film eleştirisine hak ettiği saygınlığı kazandırmak için çeşitli uygulamalar yapılmıştır. Bu uygulamalardan biri film alanı eğitimini içermektedir. Türkiye'de üniversitelerin ilgili alan müfredatında "film eleştirisi" dersleri bulunmaktadır. Ancak bu derslerin öğrencilerin sinemayı algılayışlarında ve filmleri değerlendirmelerinde yapmış olduğu katkısı irdelenen bilimsel bir çalışma bulunmamaktadır. Bu çalışmanın amacı film eleştirisi dersi alan öğrencilerin, verilen dersler sonrasında filmleri anlamalarında ve yorumlamalarında anlamlı bir farklılığın oluşup oluşmadığını irdelemektir. Bu amaç doğrultusunda bir vakıf üniversitesinde Film Eleştirisi dersi alan (Radyo Televizyon ve Sinema 4. Sınıf) 19 öğrenciden film eleştiri yaklaşımlarıyla eleştirilebilecek 10 filmin yer aldığı film örneklerinden bir adet film seçmeleri istenmiş, öğrencilerden bu film hakkında, 14 hafta boyunca işlenen dersin ilk haftasında, vize sınavlarından sonraki haftaya denk gelen 9. haftada ve derslerin son haftası olan 14. haftada en az 1 sayfalık eleştiri yazısı kaleme alması beklenmiştir. Öğrenciler belirtilen haftaların bitiminde seçmiş oldukları filmi toplamda üç kere eleştiri yazısıyla ele almışlardır. Eleştiri yazılan doküman analizi yöntemiyle incelenmiş, yazılar, kullanılan başlık, dil kullanımı, seçilen film eleştiri yaklaşımı ve bu yaklaşımın uygunluğu, üslup, yazılarda öne çıkan değerlendirme konuları, yetkinlik gibi temalara ayrılmıştır. Bu temalar özelinde ilk yazıdan son yazıya kadar var olan değişimler saptanmıştır. Eleştiri yazılarında süreç içerisinde ilk tur yazılarda hiç kullanılmayan, sosyolojik (K6), psikanalitik (K1, K3), göstergebilimsel (K13), tarihsel (K4, K8, K15), auteur (K5), ideolojik (K8, K12) ve feminist (K6) film eleştiri yaklaşımlarının tercih edilmeye başlandığı görülmüştür. Ancak yazılan eleştiri yazılarında bu yaklaşımların tam anlamıyla doğru seçilerek kullanıldığı söylenememektedir. Ayrıca katılımcıların filmleri değerlendirmek için yazmış olduğu yazıların film tanıtım yazısı ile film eleştiri yazısı arasında bir konumda kaldığı sonucuna ulaşılmıştır.

Anahtar kelimeler: Film eleştirisi, Sinema, Eleştiri

EVALUATION OF THE CRITICAL WRITING ACQUISITIONS OF STUDENTS TAKING THE FILM CRITICISM COURSE

Abstract

Film criticism, which started to be taught in France under the umbrella of universities in the 1950s, has remained in a line close to film promotion activities under the guidance of newspapers for a long time in our country since Muhsin Ertuğrul wrote a review for the film Pençe. In our country, various practices have been carried out in order to free film criticism from this line and to give film criticism the prestige that it deserves. One of these practices involves film education. There are "film criticism" courses in the curricula of universities in Turkey. However, there is no scientific study that examines the contribution of these courses to students' perception of cinema and their evaluation of films. The aim of this study is to examine whether there is a significant difference in the comprehension and interpretation of films by students taking film criticism courses after the courses. For this purpose, 19 students taking a Film Criticism course (Radio, Television and Cinema 4th grade) at a foundation university were asked to select one film from a sample of 10 films that could be criticized with film criticism approaches, and students were expected to write at least 1-page criticism about this film in the first week of the 14-week course, in the 9th week, which coincided with the week after midterm exams, and in the 14th week, the last week of the course. At the end of the specified weeks, the students reviewed the selected film three times in total. The criticism texts were analyzed by document analysis method, and the essays were divided into themes such as the title used, language use, the chosen film criticism approach and the appropriateness of this approach, style, evaluation topics that stand out in the essays, and competence. The changes in these themes from the first to the last text were identified. It was observed that sociological (P6), semiotic (P13), historical (P8, P15), ideological

The Art Nouveau Influence on the Residential Buildings of Raimondo D'Aronco

Alev Erarslan*

Istanbul Aydın University, Istanbul, Turkey

Received 2023-12-27; accepted 2024-11-13

Keywords

Art Nouveau, Ottoman architecture, Period of Ottoman Westernization, Raimondo D'Aronco, residential architecture.

Abstract

The eighteenth and nineteenth centuries are known as the Westernization Period of Ottoman architecture. As in all the various types of structures built in this period, the Western influence is also seen in residential architecture. During this period, the Neo-Baroque, Neo-Gothic, Neo-Classical, Orientalism, Eclecticism, Art Nouveau, Swiss Chalet and English Victorian styles, as well as other European-based architectural movements exerted a definitive effect on Ottoman architecture, producing a rich diversity of styles as a result. One of the styles that was generally implemented by foreign architects was Art Nouveau. The most powerful representative of Art Nouveau in Ottoman architecture was Raimondo D'Aronco. The aim of this article is to discuss the influence on residential architecture of the Art Nouveau style that came to dominate Ottoman architecture from 1893, as seen in the designs of Raimondo D'Aronco.

Prof. Dr. Alev Erarslan's article titled "The Art Nouveau Influence on the Residential Buildings of Raimondo D'Aronco", was published in Architecture and Urban Planning Journal Vol 20, Issue 1'de. The journal is Scopus indexed and under the scope of Q2.

Abstract: This article examines the transformative impact of symbiotic architecture on historical buildings, highlighting the integration of contemporary additions that enhance both functionality and design while preserving cultural heritage. Today, as historical structures face challenges in adapting to modern needs, symbiotic architecture emerges as a solution that bridges the gap between the past and present. This architectural approach aims to revitalize these structures without compromising their essence. Through various examples, the article demonstrates how such augmentations redefine the structural and experiential nature of historical buildings. The main goal of symbiotic architecture is to preserve the historical fabric while making it suitable for modern usage scenarios. Such projects ensure that the aesthetic and cultural heritage from the past is passed on to future generations, while transforming buildings to meet the expectations of contemporary users. Additionally, the article emphasizes the importance of the delicate balance established between historical elements and contemporary features in creating innovative and sustainable urban environments. Achieving this balance between conservation and innovation presents challenges not only in terms of architectural aesthetics but also within cultural and social contexts. The article underscores the role of symbiotic architecture in creating modern cities that honor the values of the past while meeting the needs of the present. This approach facilitates not only the preservation of historical structures but also their integration into modern urban life, breathing new life into them.

Kültürel Mirasın Korunması ve Sürdürülebilir Kentsel Geleceğin Şekillendirilmesi: Simbiyotik Mimarinin Tarihi Yapılar Üzerindeki Dönüştürücü Etkisi

Özet: Bu makale, tarihi yapıların dönüşümünde simbiyotik mimarinin dönüştürücü etkisini inceliyor ve çağdaş eklemelerin hem işlevselliği hem de tasarımı geliştiren, aynı zamanda kültürel mirası koruyan entegrasyonlarını vurguluyor. Günümüzde tarihi yapılar, modern ihtiyaçlara uyum sağlama zorluklarıyla karşı karşıya kalırken, simbiyotik mimari, geçmiş ile günümüz arasında bir köprü oluşturan bir çözüm olarak ön plana çıkıyor. Bu mimari yaklaşım, yapıların özünü zarar vermeden onlara yeni bir hayat kazandırmayı amaçlıyor. Çeşitli örnekler aracılığıyla makale, bu eklemelerin tarihi binaların yapısal ve deneyimsel olarak nasıl yeniden tanımlandığını ortaya koyuyor. Simbiyotik mimarinin temel amacı, tarihi dokuyu korurken onu modern kullanım senaryolarına uygun hale getirmektir. Bu tür projeler, geçmişten kalan estetik ve kültürel mirası gelecek nesillere taşıırken, yapıların günümüz kullanıcılarının beklentilerini karşılayacak şekilde dönüştürülmesini sağlıyor. Ayrıca, makale, yenilikçi ve sürdürülebilir şehir ortamları yaratmak için tarihi yapılarla çağdaş unsurlar arasında kurulan hassas dengenin önemini vurguluyor. Koruma ve yenilik arasındaki bu dengeyi sağlamak, sadece mimari estetik açıdan değil, aynı zamanda kültürel ve sosyal bağlamda da zorluklar barındırıyor. Simbiyotik mimarinin, hem geçmişin değerlerini onurlandıran hem de günümüz ihtiyaçlarına yanıt veren modern şehirler yaratmada oynadığı rolün altı çiziliyor. Bu yaklaşım, tarihi yapıların yalnızca korunmasını değil, aynı zamanda modern kentsel yaşama entegre edilerek yeniden hayata döndürülmesini sağlıyor.

Anahtar kelimeler: Tarihi Yapı, Çağdaş Uzantı, Simbiyotik İlişki, Yeniden İşlevlendirme, Yeniden Canlandırma.
