During his visit to Iran, President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, met with the Acting Minister of Science, Research and Technology of the Islamic Republic of Iran, Prof. Dr. Farhad Yazdandoost.

In the meeting, many important opportunities were discussed to deepen academic cooperation between the two countries and to develop joint projects.

During his visit to Iran, President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, came together with the Chairman of the Education Committee of the Islamic Consultative Assembly of Iran, Prof. Dr. Alireza Monadi Sefidan, and significant steps were taken to further strengthen cooperation in the field of education.

AYDIN AGENDA

3

During his visit to Iran, President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, paid an official visit to the Ambassador of the Republic of Türkiye in Tehran, Prof. Dr. Hicabi Kırlangıç, at his office.

During his visit to Iran, President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, visited the President of the Iran Chamber of Commerce, Industries, Mines, and Agriculture, Mr. Samad Hassanzadeh. In the meeting, ideas were exchanged on strengthening trade between Türkiye and Iran and enhancing bilateral cooperation.

During his visit to Iran, President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, held meetings with the Directors of the Ministry of Science, Research and Technology of the Islamic Republic of Iran. The discussions focused on joint projects, academic exchange programs, and technology-oriented collaborations.

The EURAS Joint Academic Program, held at Amirkabir University of Technology with the participation of Prof. Dr. Mustafa Aydın, President of the Board of Trustees of Istanbul Aydın University and President of EURAS, received wide coverage in the Iranian media. The meeting was considered an important step toward deepening academic, scientific, and cultural cooperation between the universities of the two countries.

AYDIN AGENDA

7

In the meeting between President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, and Deputy Minister of Science, Research and Technology of the Islamic Republic of Iran, Prof. Dr. Mohammad Nabi Shahiki Tash, ways to establish strong cooperation between the two countries in the fields of education, research, and innovation were discussed.

AYDIN AGENDA

9

President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, attended the Executive Board meeting of the Services Exporters Association (HİB) in April.

President of the Board of Trustees of Istanbul Aydın University, Prof. Dr. Mustafa Aydın, met with the Prime Minister of Italy, Giorgia Meloni, in Rome.

AYDIN AGENDA

15

Delightful Cappadocia Spring School 2025, offering its participants an unforgettable educational and exploration experience, has kicked off with a wide array of cultural activities.

The founding foundation of İAÜ, AKEV, came together with children under state protection on the occasion of the 23rd of April National Sovereignty and Children's Day. On this special day filled with colorful workshops, games, and surprise activities, the little hearts had a great time and enjoyed themselves to the fullest.

Istanbul Aydın University participated in the Turkey Universities Education Fair held in Jakarta, Indonesia. As part of the fair, Turkish universities, along with the delegation, visited the Embassy of the Republic of Turkey in Jakarta. We express our gratitude to Ambassador Prof. Dr. Talip Küçükcan for his hospitality and support.

The Aydin Policies Platform, one of Istanbul Aydın University's think tanks, brought up the topic of "The Trump Era and Trade Wars," one of the most striking issues of the global economy in recent years, during its April session. The meeting, featuring Dr. Elif Kaya and Dr. T. Tuncay Tosun, faculty members from the Faculty of Economics and Administrative Sciences at İAÜ, was attended by Prof. Dr. Mustafa Aydın, President of the Board of Trustees of Istanbul Aydın University, along with many academics.

AYDIN AGENDA

20

Istanbul Aydın University has achieved a significant success in the Times Higher Education (THE) Asia University Rankings 2025, one of the most respected evaluation platforms in international higher education. Placing in the 601+ band, our university ranked 35th among the 91 Turkish universities listed, and 13th among the 32 foundation universities. We congratulate everyone who contributed to this achievement, which reflects our scientific productivity and global vision. As Istanbul Aydın University, we continue to work resolutely for a brighter future.

FACULTY OF PHARMACY

24

Assoc. Prof. Dr. Sevgi Karakuş, who works at the Faculty of Pharmacy, has been appointed as a Professor in the Department of Pharmaceutical Chemistry, Pharmaceutical Sciences Division. We congratulate her on this achievement.

FACULTY OF PHARMACY

25

Prof. Dr. Yusuf Öztürk, a faculty member of the Department of Pharmacology, has published his work titled "Superdrugs & Supertherapies: High prices to pay for miracles" in the Q3 indexed journal *Acta Pharmaceutica Sciea*.

Superdrugs & Supertherapies: High prices to pay for miracles...

Editorial Article

Yusuf ÖZTÜRK*

Istanbul Aydın University, Faculty of Pharmacy, Department of Pharmacology, Istanbul, Türkiye

Today, in Istanbul and other parts of our country, at bus stops, metro stations and on various street corners, we can hear the heartbreaking cries of parents of children with SMA (Spinal Muscular Atrophy) Type-1 seeking financial resources for exorbitantly priced treatment. In fact, this is a gene-based life-saving treatment that is effective in pediatric patients under two years of age with just one dose. This miraculous treatment costs patients approximately \$2.1 million. This miraculous treatment costs patients around \$2.1 million. But that is not all, and it is not the most expensive either, there are others worth mentioning.

After a rocky start, gene therapy is on fire and drawing intense interest from the biopharmaceutical industry—and it's still evolving and improving. In fact, the journey of fundamental developments in gene therapy begins with the discovery of the DNA structure by Watson and Crick in the year of 1953. The concept of gene therapies first emerged in the 1960s, when the feasibility of adding new genetic functions to mammalian cells began to be studied. Several methods for this purpose were tested, including injecting genes directly into a living mammalian cell via a micropipette and exposing the cells to a DNA precipitate containing the desired genes. Later, scientists developed theories that viruses could also be used as a vehicle or vector to deliver new genes to cells. Among the avenues of biomedical sciences, humanity's fast lane, but hard journey to gene therapies began in the 1990s. There are various versions of gene therapies forming different highways to arrive final destination of therapy. But unfortunately, some of these highways of gene therapies have turned into dead-end streets:

Lenalidomide-like novel drug derivative

Drug delivery system

Triple negative breast cancer

ABSTRACT

Lenalidomide (L0) is an immunomodulatory agent with a range of effects, including anticancer and anti-inflammatory activity, and is commonly utilized in treating multiple myeloma. A derivative of lenalidomide (L1) has been synthesized to enhance its effects and to target different cancer cell types. In this study, the lenalidomide derivative L1, with the chemical structure 1-[2-(2,6-dioxopiperidin-3-yl)-1-oxoisindolin-4-yl]-3-(p-tolyl)urea, was loaded onto a novel drug delivery system (DDS), and its activity was assessed towards triple-negative breast cancer cell lines (TNBC). MIL-100, a subclass of metal-organic framework (MOF) structures, was synthesized via a microwave-assisted hydrothermal method. MIL-100 was modified with quercetin (QC) as a linker, and its drug loading capacity was optimized, achieving a 95.18 % encapsulation efficiency. Additionally, the antioxidant properties of QC contributed to enhancing the performance of the DDS. *In vitro* drug release studies of the final product, MIL-100@QC@L1, were successfully conducted. The cytotoxic influences of the formulation on MDA-MB-231 cells were assessed using the WST-1 assay. After treatment with 10 µg/mL of MIL-100@QC@L1 for 24 h, the cell viability decreased significantly to 47.8 %, showing superior results compared to treatments with L0 and L1 alone.

TÜRK HUKUKUNDA ÇOCUĞUN BAKIMI VE EĞİTİMİNİN ÇOCUK HAKLARI İLE İLGİLİ TEMEL İLKELERİN IŞIĞINDA DEĞERLENDİRİLMESİ

Prof. Dr. Ebru CEYLAN¹

Giriş

Çağdaş toplumlarda çocuk, ailede bir birey olarak özen gösterilen ve önem verilen bir varlıktır. Çocuk hakları, insan haklarının bir parçasıdır. Bu haklar, çocuğun bedensel, zihinsel, duygusal bakımından gelişmesinin ve korunmasının sağlanması için yaşamında ihtiyacı olan haklarıdır. Çocuğun en temel hakkı aile içinde sağlıklı bir şekilde bakılarak gelişmesi ve yetiştirilmesi hakkıdır. Çocuğun annesi ve babası velayet hakkına dayanarak çocuğu topluma kazandırmakla hem kendisine karşı hem de topluma karşı sorumludur. Devlet de anne ve babanın mali gücünün yeterli olmaması halinde çocuğun yetiştirilmesinde sorumluluk altındadır.

Hukuk düzeni içinde çocuğun korunması gereken bir varlık olarak kabul edilmesi, 20. yy. ‘da yaşanan iki dünya savaşı sonrasında kabul edilen insan hakları ile ilgili Uluslararası Sözleşmelerle mümkün olmuştur. Çocuğun hakları alanında en geniş kapsamlı evrensel ilkeleri düzenleyen Birleşmiş Milletler Çocuk Hakları Sözleşmesinin m.2, m. 3, m.5 ve m. 12 hükümlerinde yer alan temel ilkeleri bizim iç hukukumuzu

Kavramsal Sanat ve Fotoğrafta Estetik

Conceptual Art and Aesthetics in Photography

Öz

Tarihsel süreçte sanat her zaman kavramlarla ilgili içinde olmuştur, ancak kavramsal sanatın ortaya çıkışıyla sanatçılar, çalışmalarında malzemeyi değil kavramları ve fikirleri ön planda tutmuşlardır. Resim sanatının temel işlevlerinden biri gibi görülen gerçekliği temsil etme durumu, yani belgesel niteliği, fotoğrafın keşfiyle değişime uğramıştır. Bu gelişme, sanatçıları özgürleştirmiş, iç dünyalarını, özgün düşüncelerini dışavuracak çalışmaların önünü açmış ve kavramsal sanatın temel etkenlerinden biri olmuştur. Zamanla bu yeni sanat anlayışından fotoğraf da etkilenmiş, kavramsal fotoğraf tanımı ortaya çıkmıştır. Bu makalede daraltılmış kotah örneklem olarak kavramsal sanat ve fotoğraf ilişkisini en iyi temsil eden öncü sanatçılardan Joseph Kosuth ve John Baldessari seçilmiştir. Sanatçıların eserleri, fotoğraf ve metin kullanımı üzerinden kavramsal sanatın estetik ve anlam çerçevesinde nasıl dönüştüğünü incelemektedir. Kavramsal fotoğrafta, özellikle Baldessari'nin kadrosuyla geleneksel kompozisyon anlayışı ve estetik algı değişime uğramıştır. Sanatçı, çalışmalarında gündelik görüntüleri ve metinleri kullanarak sanatı sorgulamış; fotoğrafın estetik değerlerinden ziyade, düşünsel boyutunu ve iletişimdeki rolünü ön plana çıkarmıştır. Böylelikle "iyi" fotoğraf tanımı da güncellenmiştir. Bu makale, kavramsal sanatın oluşumu ile fotoğraf arasındaki ilişkiyi ve bu süreçte estetik anlayışın dönüşümünü incelemiştir. Bu doğrultuda, günümüzde estetikteki ilişkisini koruyan kavramsal yaklaşımların varlığı da göz önünde bulundurularak, yazarların özgün sanat eserlerine yer verilmiş ve kavramsal sanatın günümüzdeki yansımaları çözümlenmiştir.

Anahtar Kelimeler: Kavramsal Sanat, Fotoğraf, Estetik

ABSTRACT

Throughout history, art has always been in relation with concepts. However, with the emergence of conceptual art, artists prioritized ideas and concepts over materials in their works. The function of painting as a means of representing reality its documentary nature underwent a transformation with the invention of photography. This development liberated artists, enabling them to express their inner worlds and unique ideas, paving the way for works that emphasize thought rather than materiality, ultimately becoming one of the fundamental factors of conceptual art. Over time, photography was also influenced by this new artistic approach, leading to the emergence of the concept of conceptual photography. In this study, Joseph Kosuth and John Baldessari, two pioneering and foundational artists who best represent the relationship between conceptual art and photography, were selected through a narrowed quota sampling. Their works explore how conceptual art has evolved within the framework of aesthetics and meaning through the use of photography and text. In conceptual photography, particularly with Baldessari's contributions, traditional notions of composition and aesthetic perception have undergone significant changes. The artist has questioned art by incorporating everyday images and texts into his works, emphasizing the intellectual dimension of photography and its role in communication rather than its aesthetic values. Consequently, the definition of 'good' photography has been revised. This study examines the relationship between the emergence of conceptual art and photography, as well as the transformation of aesthetic perception in this process. In this context, considering the existence of conceptual approaches that still maintain a connection with aesthetics today, the authors' original artworks have been included, and the contemporary reflections of conceptual art have been exemplified.
