Under the leadership of the Faculty of Education at Istanbul Aydın University, in collaboration with the Anadolu Culture and Education Foundation (AKEV), Kangaroo Mathematics, and Caribou Mathematics, a "Mathematics and Education Festival" was organized from February 3-14, 2025, at the IAU Nurdağı Education and Life Campus in the Nurdağı district of Gaziantep. The event was aimed at 1,200 students affected by the earthquake. The festival, led by students of the Primary School Mathematics Teaching Program under the supervision of Assoc. Prof. Dr. Duygu Özdemir, aimed to help students learn mathematics in a fun and innovative way by materializing their mathematical knowledge. The goal was to positively impact their interest, motivation, and success in mathematics.

The Mathematics Education Club, under the supervision of Associate Professor Dr. Duygu Özdemir from the Faculty of Education, Primary School Mathematics Teaching Program, and the assistance of Research Assistant Büşra Kırıl Demir, collected stationery supplies as part of the "Sister Village School Project" and delivered them to students in need at village schools. The project was also supported by the Anatolian Education and Culture Foundation (AKEV).

The Faculty of Education, Department of Primary Education Mathematics Teaching Program, Faculty Member Assoc. Prof. Dr. Duygu Özdemir and the Special Education Teaching Program, Dr. Instructor Member Murat Balcı, held a meeting on February 19, 2025, with the Deputy Mayor of Beylikdüzü, Emel Turan, and her team, as part of an academic and educational collaboration requested by Beylikdüzü Municipality.

Prof. Dr. Belma Tuğrul, Head of the Preschool Teaching Program at the Faculty of Education, participated as a speaker in the event titled "Early Childhood Education Summit-2," held on February 22, 2025, at the Biruni University Conference Center.

UZMAN GÖRÜŞÜ

ÖZEL ÖĞRENME GÜÇLÜĞÜ GERÇEKTE NEDİR? NE DEĞİLDİR?

İstanbul Aydın Üniversitesi, Eğitim Fakültesi, Özel Eğitim Öğretmenliği Bölümü Dr. Öğr. Üyesi Murat Balcı özel öğrenme güçlüğüne dair doğru bilinen yanlışları ve çözüm yollarını ÖÇED Dergisi için kaleme aldı.

Özel Öğrenme Güçlüğü (ÖÖG) son derece güncel ve popüler bir kavram olmasına karşın diğer özel eğitim alanları ile karşılaştırıldığında yeni bir kavram olduğu görülüyor. DSM'deki ilk tanımlamasının 1975 yılında yapıldığını ve bu tarihten itibaren resmi olarak literatürde yer aldığını söylersek ÖÖG'nin ne kadar yeni bir kavram olduğu daha iyi anlaşılacaktır. ÖÖG'nin Türkiye'deki tanınması ise 2012 yılında gerçekleşmiştir. Bu tanımlamalara göre ÖÖG; bireyin zekâ düzeyi ve yaşı ile uyumlu olmayan, akademik becerilerde (okuma, yazma, dinleme, anlama, temel matematik becerileri, problem çözme, iletişim kurma, sözel ifade yeteneği) belirgin bir gerilikle karakterize edilen nörogelişimsel bir bozukluktur. Okuma (disleksi), yazma (disgrafi) veya matematik (diskalkuli) gibi öğrenme alanlarından sadece birinde görülebildiği gibi birkaçında da görülebilmektedir. Amerikan Psikiyatri Birliği'nin (APA) yayınladığı Ruhsal Bozukluklar Tanı ve Sınıflandırma El Kitabı'nın Beşinci Baskısı (DSM-5) öğrenme gücünü, bireyin akademik performansını olumsuz etkileyen kalıcı ve önemli bir yetersizlik olarak tanımlar.

Abstract

This study aims to examine the self-efficacy levels of early childhood teachers in terms of various variables (age, marital status, department graduated, education level, professional experience). The survey model, one of the quantitative research methods, was used in the present study. Criterion sampling; one of the methods of purposive sampling is applied. 219 early childhood teachers working as early childhood teachers in different provinces of Turkey participated in the study. The data for the study was collected using the "Teacher Self-Efficacy Scale," which was adapted to Turkish by Çapa, Çakıroğlu, and Sankaya (2005). The construct validity of this scale was confirmed by performing a confirmatory factor analysis for early childhood teachers. The data was analyzed using the SPSS-28 statistical program. The relevant data were subjected to the Mann-Whitney U and Kruskal Wallis H tests. Confirmatory factor analysis was performed using the Amos program, and the results indicated that the scale had acceptable fit values. In addition, the reliability level was found to be high, with the Cronbach Alpha internal consistency reliability coefficient being .97. Based on the research results, the self-efficacy of early childhood teachers varied significantly based on age group, marital status, and professional experience. However, no significant difference was observed in the self-efficacy levels of early childhood teachers based on their education level and economic status.

İklim Değişikliği Düzenlemeleri Çerçevesinde Emisyon Ticareti Sisteminin Ticari İşletmelere Etkileri Üzerine Bir İnceleme^(*)

An Examination of the Impact of the Emissions Trading System on Commercial Enterprises within the Framework of Climate Change Regulations

Nuri ERDEM^()*

Öz:

Emisyon ticareti, çevresel kirliliği azaltmayı hedefleyen piyasa temelli bir mekanizma olarak, çevre ve enerji politikalarının ayrılmaz bir parçası haline gelmiştir. Ülkemizde de AB'ye uyum süreci kapsamında, karbon emisyonlarının kontrolü ve ticareti konusunda çeşitli hukuki düzenlemeler yapılmaktadır. Bu çalışma, Türk hukukunda mevcut ve yapılmakta olan düzenlemeleri incelerken, ticaret hukuku perspektifinden emisyon ticaretinin olası etkilerini değerlendirmekte, emisyon ticareti sisteminin ticari işletmelere getirebileceği yükümlülükleri ele alarak öneriler sunmaktadır. Küresel ısınma ve iklim değişikliği tehdidi, bu konuda konulacak kuralların da ivedilikle hayata geçirilmesine sebebiyet vermiştir. Ülkemizde 2021 yılından beri yapılan çalışmalar neticesinde hazırlanan İklim Değişikliği Kanunu ve ilgili yönetmelik tasarıları 2023 yılı itibarıyla kamuoyuna yansımış durumdadır. Birleşmiş Milletler İklim Değişikliği Çerçeve Sözleşmesi'ni esas alan, Türkiye'nin de taraf olduğu Paris Anlaşması uyarınca belirlenen emisyon hedefleri doğrultusunda salınımı azaltma zorunluluğu yanında işletmelerin faaliyetlerini devam ettirebilmeleri için sera gazı emisyon izin ve raporlamalarına ilişkin yükümlülükler tasarıda yer verildiği, tahsisatlarının ticaretine yönelik emisyon ticaret sistemi ile ticaretin yapılacağı bir karbon piyasası teşekkülünün de tasarıda düzenlenmekte olduğu görülmektedir. Tasarı kanun ile getirilen ilave yükümlülüklerin ticari işletmeler üzerinde olası etkileri ile oluşturulmak istenen emisyon ticaret sistemi ve tahsisatlar, ticaret hukuku bakış açısı ile çalışmamızda değerlendirilmiştir.

Anahtar Kelimeler:

İklimin Korunması, Ticari İşletmeler, Emisyon Ticareti, Karbon Piyasası, Tahsisatlar.

ABSTRACT

Objective: The primary aim of this study was to examine the relationship between parental attitudes and language development in preschool children with cochlear implants. In addition, the study aimed to examine parental attitudes in relation to socio-demographic and cochlear implant related variables.

Methods: This study is based on the relational survey model. A total of 47 children aged 2–5 years, 23 girls and 24 boys, and one of their parents were included in the study. Test of Early Language Development Test-3-Turkish Adaptation was applied to measure the language development levels of the children. In order to determine parental attitudes, 5-point Likert-type Parental Attitude Scale consisting of 46 items was completed by the parents.

Results: Democratic attitudes were found to be the most common type of parental attitude (4.33 ± 0.45). Significance was found for overprotective parental attitudes according to cochlear implant age and economic income level. Statistically significant, moderate negative correlation was found between overprotective parental attitude scores and receptive language, expressive language, and composite verbal language scores ($r: 0.401$; $r: 0.337$; $r: 0.390$; $p < 0.05$, respectively).

Conclusion: It was concluded that there was a relationship between overprotective parental attitude and language skills of preschool children with cochlear implants. Overprotective parental attitudes were significantly associated with cochlear implant age and economic income level, with earlier cochlear implant age and higher income correlating with less overprotection.

A meeting regarding the events planned to be organized at our university within the scope of the 'Family Year' was held under the leadership of Associate Professor Dr. Mira ASSADI with Istanbul Aydın University Rector Prof. Dr. İbrahim Hakkı AYDIN.
