Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN met with businesspeople in Ashgabat within the scope of the World Turkish Business Council (WTBC) Turkmenistan Turkish Business World Meeting, held with the attendance of our Vice President Cevdet YILMAZ and hosted by WTBC Turkmenistan Representative Burak YOĞURTÇU.

During his visit to Turkmenistan, Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN carried out visits to various locations in Ashgabat.

Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN met with young hafiz during the Qur'an recitation held before the Friday prayer at Istanbul Aydın University mosques.

AYDIN AGENDA

4

The Foreign Economic Relations Board (DEİK) June Board of Directors Meeting was held with the participation of Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN, where preparations for the 39th DEİK Ordinary Financial General Assembly were discussed.

The 39th DEİK Ordinary Financial General Assembly Meeting was held with the participation of Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN, along with DEİK Board Members, Founding Organization Presidents, Business Council Presidents, and distinguished delegates.

The 5th DEİK Respect to Masters Award Ceremony was held with the participation of Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN, along with our Minister of Trade Prof. Dr. Ömer BOLAT, our Minister of Industry and Technology Mehmet Fatih KACIR, our Minister of Justice Akın GÜRLEK, our Minister of Family and Social Services Mahinur ÖZDEMİR GÖKTAŞ, our former ministers, DEİK Chairman Nail OLPAK, Executive and Board Members, Founding Organization Presidents and Representatives, Business Council Presidents, and delegates.

Küçükçekmece City Council June Executive Board Meeting, attended by Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN, was held with the accompaniment of Küçükçekmece District Governor Mustafa ANTEPLİOĞLU and Mayor Kemal ÇEBİ.

The June meeting of the monthly regular gatherings held with the administrative staff of Istanbul Aydın University, chaired by Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN, took place.

The UFRAD Franchising Association June Board of Directors Meeting, attended by Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN, was held at Ercan Steakhouse hosted by Nevada Coffee Franchise Deputy General Manager Cemal Güven. During the meeting, the association's ongoing activities were evaluated, while planned events for June 10 World Franchise Day and preparations for the UFRAD Brand Summit, one of the sector's major gatherings, were discussed.

Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN hosted former Speaker of the Grand National Assembly of Turkey İsmail KAHRAMAN, former President of Religious Affairs Prof. Dr. Ali ERBAŞ, and Ministers Assoc. Prof. Nureddin NEBATİ and Dr. İdris GÜLLÜCE at Istanbul Aydın University.

Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN hosted collector Yusuf İYİLİK at Istanbul Aydın University.

NEWS FROM THE CAMPUS

According to the CWUR 2026 results, which determine the course of global education, Istanbul Aydın University ranked 4th among foundation universities in Turkey, once again confirming its international academic strength.

The graphic features the Istanbul Aydın University logo and CWUR World University Rankings logo at the top. The main text is in large, bold, blue letters. Below it, the CWUR 2026 results are announced in red and white text. At the bottom, a stylized blue staircase with a flag at the top is shown, with a handwritten-style message in white and red text.

In the seminar organized by the Küçükçekmece Probation Directorate on June 2, 2026, to raise awareness of rights and responsibilities among probationers, the topic of "Legal Rights and Responsibilities" was addressed by Asst. Prof. Atakan Uzun from the Faculty of Law.

Lecturer Volkan BUDAK from the Visual Communication Design Department participated in the event titled "Two Films, Two Modes of Production: Yaban and Eksik," organized within the scope of Istanbul Topkapı University's Media and Communication Workshop. During the event, our instructor's films Yaban and Eksik were screened for the audience, while the different production processes, creative choices, and independent cinema practices of the two productions were discussed. In the talk session, participants had the opportunity to ask questions about film production processes and hear about industry experiences firsthand.

Abstract

Adaptive reuse has become a central strategy for extending the cultural, environmental, and functional life of industrial heritage, yet the ways in which intervention logic becomes legible in multilayered heritage complexes remain insufficiently formalized. This article examines the Cibali complex in Istanbul, a former tobacco and cigarette factory reused as a university, cultural, and museum setting, in order to explain how document-based analysis can reconstruct patterns of continuity, loss, re-construction, contemporary addition, and layer articulation. Methodologically, the study develops a multi-scalar reading protocol based on the cross-matching of historical maps, aerial photographs, plans, sections, elevations, restoration proposals, and post-implementation visual material across parcel, block, courtyard, façade, structural-system, and archaeological-layer scales. The findings show that continuity was preserved primarily at the levels of parcel structure, waterfront relation, massing, façade rhythm, and silhouette, whereas more intensive transformation occurred in interior spatial organization, void re-definition, structural re-configuration, and archaeological musealization. The study concludes that adaptive reuse at Cibali operated not as a uniform conservation process, but as a differentiated and selective regime of legibility in which some historical layers were foregrounded while others were transformed, displaced, or made secondary. The significance of the article lies in proposing a case-tested analytical protocol for reading document-rich, multilayered industrial heritage sites, while recognizing that its broader transferability requires further validation through comparative application to additional cases.

Keywords: adaptive reuse; industrial heritage; multilayered heritage; document-based comparative analysis; morphological continuity; palimpsest; layer articulation; Cibali

Mapping SDG Alignment in Project and Construction Management Education in Architecture: Life-Cycle, Digital, and Governance Perspectives from Türkiye

Abstract

The integration of the Sustainable Development Goals (SDGs) into architectural education has received increasing scholarly attention; however, this discussion has largely focused on design studios, environmental design, sustainable design pedagogies, or program-level curriculum mapping. By contrast, project/construction management, construction economics, design economics, time management, and construction project management courses have received comparatively less attention as specific curricular sites for SDG-oriented integration. This study analyzes course information packages related to project/construction management in selected undergraduate architecture programs in Türkiye through an SDG-oriented curriculum mapping approach. Methodologically, the study combines document-based comparative curriculum mapping, directed qualitative content analysis, six thematic coding areas, 0–3 thematic intensity coding, and SDG alignment. The comparative analysis group consists of eight courses related to project/construction management, construction economics, design economics, time management, and construction project management. The findings show that the project/construction management core is strongly represented across all analyzed courses. Sustainability and SDG orientation are most visible in the Design Economics and Special Topics of Construction Project Management courses, while the Time Management in Building Production course stands out in relation to digital/software-supported management. The SDG alignment profile indicates strong visibility for SDG 11, SDG 4, SDG 16, and SDG 12; moderate-to-strong visibility for SDG 9; and a more indirect visibility for SDG 13 through life-cycle thinking, resource efficiency, and sustainable construction management. The original contribution of the study lies in positioning project/construction management courses as a specialized curricular field within SDG-oriented architectural education and in proposing the SDG-Oriented Project/Construction Management Education Matrix. The results suggest that project/construction management courses are not merely technical professional courses; rather, through time, cost, quality, risk, contracts, life-cycle costing, resource management, BIM, supply chains, facility operation, ethics, and applied learning, they provide a strategic curricular foundation for sustainable built environment education.

Keywords: SDGs; curriculum mapping; architecture education; project management education; construction management education; sustainable construction; life-cycle costing; BIM; resource economy; Türkiye

The project proposal supervised by Prof. Dr. Zafer ASLAN, faculty member of the Computer Engineering Department, was awarded support within the scope of the TÜBİTAK 2209-A University Students Research Projects Support Program 2025/1 term.

Within the scope of the technical trip organized by the Department of Electrical-Electronics Engineering at Istanbul Aydın University's Faculty of Engineering, students visited the Eksim Energy Silivri Wind Power Plant (WPP) facility operating in Silivri, Istanbul. The technical trip, coordinated by Department Head Prof. Dr. Osman YILDIRIM, was attended by a large number of undergraduate students.

Prof. Dr. Osman YILDIRIM, Head of the Department of Electrical-Electronics Engineering, visited the University of Aldo Moro Bari (Italy) for a one-week period within the scope of Erasmus mobility.

Within the scope of the "Series of Academic Talks" events organized by the Department of Electrical-Electronics Engineering at Istanbul Aydın University's Faculty of Engineering, Engin DEMİRBORA, an experienced name in the telecommunications sector, met with students. DEMİRBORA, who serves as Electronics and Communications Project Director at Hyperion Telecom and is one of the leading professionals in the sector, delivered a presentation titled "From Enigma to the Present," explaining the historical development of telecommunications and communication technologies to the participants.

Abdurrahim YİRMİBEŞOĞLU, a graduate of the Department of Electrical-Electronics Engineering, shared his post-graduation career and entrepreneurship experiences with students. Having established his own company Baz Aydınlatma and started production activities in the field of electronics and lighting technologies, YİRMİBEŞOĞLU inspired students with his success story in the sector.

Dr. Zafer ÖZDEMİR, faculty member of Mechanical Engineering, participated in the "Global Week-2026" event held at Kaunas University of Technology in Kaunas/Lithuania between May 4-8, 2026, within the scope of Erasmus+. During the said event, lectures were given on "Cryogenic Heat Treatment" and "Advanced Welding Methods."

Dr. Tevfik Denizhan Müftüoğlu, faculty member of the Civil Engineering (English) Department, gave lectures at Politécnico de Portalegre University in Portugal within the scope of Erasmus+, bringing together both disciplines by addressing the unique artificial intelligence architecture he developed to predict extreme rainfall events that determine the design loads of critical hydraulic structures such as dam spillway capacities and urban drainage networks, for civil and computer engineering students.

Abstract

Dersim is the only region in Turkey with an Alevi majority. The major ritual practice in Dersim is the visitation of the numerous sacred natural sites, the *jiare*, which are indistinct occurrences in wilderness. The tendency in Dersim to transform the *jiare* into concrete buildings of worship is conceptualized in this study as a marker of economic and political integration of the pastoralist tribes into a centralized state and a capitalist market economy. The move away from the spatial flexibility of noncentralized pastoral systems to the market-oriented, state-regulated structures of industrial animal husbandry has profound effects in Dersim on the community's ontological relationship with nature, as well as on the lived experience with the more-than-human. While pastoralist Alevi communities with common access to productive assets such as pastures have been forcefully integrated into the networks of extractive capitalism, sacred sites expanding on vaguely demarcated ground are transformed into static arrangements.

The article titled "From Smooth to Striated: How Ritual Space is Changing in Alevi Dersim" by Dr. Gülkızılca Yürür, faculty member of the Department of Medical History and Ethics at İAÜ Faculty of Medicine, was published in the Q1 indexed journal *Numen* (Brill).

Within the scope of June 6 Dietitians' Day, a special event was organized by the İAÜ Aydın Nutrition Club for the faculty members, staff, and students of the Department of Nutrition and Dietetics.

Prof. Dr. F. Çağlayan Dinçer, faculty member of the Department of Child Development at Istanbul Aydın University Faculty of Health Sciences, participated as a speaker on behalf of the Association of Child Developers at the "We Are Together for Parents Panel" organized by the Early Childhood Development NGO Platform in Ankara on June 6, 2026, and delivered a presentation titled "Raising Thinking Children in the Context of 21st Century Skills." In her presentation, Dinçer highlighted the role of parents and educators in supporting children's thinking skills.

A conference organized by the Department of Nursing was held at Istanbul Aydın University T Block Purple Hall, bringing together participants in productive and enjoyable sessions that contributed to students' professional and personal development. Throughout the conference, sessions titled "Psychosocial Empowerment and Burnout Prevention," "Peer Mentorship and Experience Sharing," and "Professional Self-Confidence and Effective Communication" aimed to raise awareness among the attendees.

A seminar was held by the managers of Acibadem Health Group for 4th-year students of the Health Management Department. Within the scope of the seminar, information was provided about the health group's efforts regarding graduate employment and career opportunities, and a mutual exchange of views took place on the career plans of students at the graduation stage.
