# AYDIN AGENDA

1

**GastroShow 2025 was held under the theme of “Health”, with the esteemed attendance of Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, emphasized in his assessment at GastroShow 2025 that Türkiye should secure a stronger position in the global gastronomic tourism market. He expressed his gratitude to all stakeholders who contributed to the event, especially Gürkan Boztepe, President of the Gastronomy Tourism Association.**

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, supported UFRAD's vision of promoting Turkish cuisine on a global scale. The event addressed the worldwide popularity of döner and the opportunities within its branding process.**

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, stated that they hosted former Minister of the Interior Mr. Süleyman Soylu at the university and noted that they held a productive meeting on education, youth, and security policies.**

# AYDIN AGENDA

5

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, emphasized the responsibilities of universities toward the environment and society during the “Sustainability in Higher Education and GreenMetric” webinar organized by EURAS.**

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, visited Avcılar BİL College and met with the students — the future leaders — as well as the dedicated teaching staff.**

# AYDIN AGENDA

7

**Our Rector of Istanbul Aydın University, Prof. Dr. İbrahim Hakkı Aydın, and our faculty member, Prof. Dr. Yalçın Akdoğan, attended the 2025–2026 Academic Year Opening Ceremony held at the Presidential Complex with the participation of our President, Recep Tayyip Erdoğan**

# AYDIN AGENDA

8

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, evaluated the academic developments during the meetings held as part of the Arabic Language Education PhD program. He wished success for all the ongoing efforts, expressing his hope that the new steps taken in the journey of science will be beneficial.**

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, inaugurated the 5th Turkish–Arab University Presidents’ Congress held at Tunis El Manar University.**

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, emphasized that universities stand at the center of free thought, social revitalization, and global solutions in today's world.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, expressed his gratitude to all stakeholders who contributed to the 5th Turkish–Arab University Rectors' Congress. He extended special thanks to the Minister of Higher Education and Scientific Research of Tunisia, Mondher Belaid, as well as to YÖK President Prof. Dr. Erol Özvar, Tunisian Ambassador Ahmet Misbah Demircan, Secretary General of the Association of Arab Universities Prof. Dr. Ezzat Salama, and Rector of El Manar University and EURAS Coordinator İrem Arman.**

# AYDIN AGENDA

12

**Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN attended the opening of the “International Conference on Advanced Technologies in Engineering,” hosted by Tashkent State Transport University.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, emphasized that in higher education, the era of resilience, rather than competition, has now begun.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, stated that within the scope of the Turkish–Arab University Rectors Congress held in Tunisia, they signed memoranda of understanding with many universities as the Eurasian Universities Union (EURAS).**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, emphasized in a statement on the occasion of October 11, International Day of the Girl Child, that the light in girls' eyes is the strongest guarantee of the future. He noted that building a fairer, safer, and more equal world is possible by supporting their dreams, and he extended his wishes to all girls on this special day.**

# AYDIN AGENDA

16

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, met with Ms. Berrak Bilgen Beşergil, Head of the Department of Innovative Services at the Republic of Turkey Ministry of Trade, during his visits in Tunisia.**

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, stated that the opening of the Education Fair held in Tunisia took place with the participation of the Ambassador of the Republic of Turkey to Tunisia, Mr. Ahmet Misbah Demircan, representatives from the Council of Higher Education (YÖK) and the Ministry of Trade, along with our university rectors and a large turnout of Tunisian students and their parents.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, emphasized in his assessment during the contacts and education fair held in Tunisia that this meeting has brought the deep-rooted friendship between Turkey and Tunisia, as well as cooperation in the field of higher education, to a new level.**

**Prof. Dr. Mustafa Aydın, Chairman of the Board of Trustees of Istanbul Aydın University, attended the October Board of Directors Meeting of the Küçükçekmece City Council, where he evaluated projects contributing to the city's vision, ideas to strengthen social participation, and opportunities for collaboration.**

**İstanbul Aydın University Board of Trustees Chairman and DEİK Education Economy Business Council Chairman Prof. Dr. Mustafa AYDIN attended the DEİK October Board of Directors Meeting.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University and Chairman of the DEİK Education and Economy Business Council, attended the October Executive Board Meeting of the DEİK Foreign Exchange-Earning Services Working Group.**

# AYDIN AGENDA

22

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University and President of the Eurasian Universities Union (EURAS), stated at the EURAS October Board of Directors meeting that, in addition to evaluating past efforts, new steps shaping the future have also been taken.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University and Head of the Education Committee of the Exporters' Association of Services (HİB), stated at HİB's October Board of Directors meeting that strategies aimed at increasing Turkey's share in global service exports were discussed.**

**Prof. Dr. Mustafa AYDIN, Chairman of the Board of Trustees of Istanbul Aydın University, expressed that they were greatly honored to host Prof. Dr. Hasan Azizoğlu Hasanov, former Prime Minister and Foreign Minister of Azerbaijan, at the October meeting of the Aydın Thought Platform.**

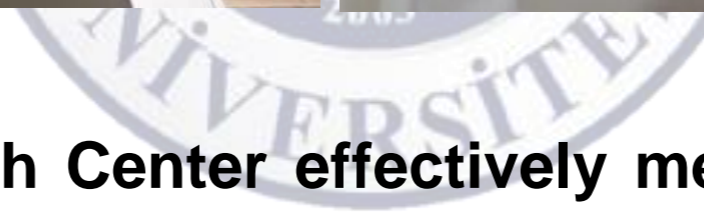

**Istanbul Aydın University Board of Trustees Chairman Prof. Dr. Mustafa AYDIN inaugurated the 3rd International Congress on Learning Disabilities, held hosted by the university.**

## NEWS FROM THE CAMPUS

26

**Istanbul Aydın University Health Center effectively meets the needs of students and staff through the healthcare services and counseling opportunities it offers. The center supports the university community with preventive healthcare practices, individual counseling, and emergency intervention services.**

## NEWS FROM THE CAMPUS

ID 0009-0009-5614-1877

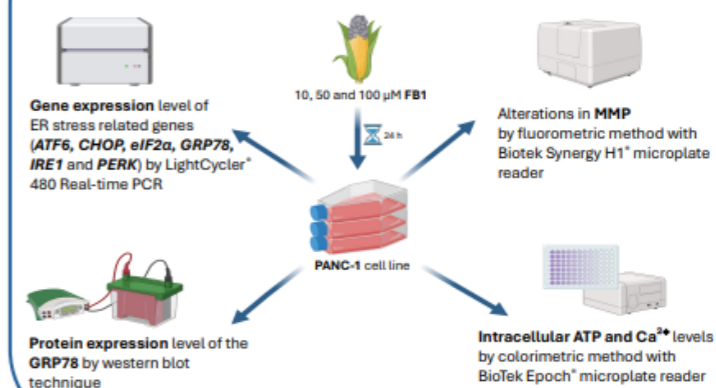

### Background

- Fumonisin B1 (FB1) is a *Fusarium* mycotoxin found in maize and other crops.
- It poses a serious risk to human and animal health.
- It is known to cause liver and kidney toxicity.
- FB1 also disrupts lipid metabolism.
- Its toxic effects on the pancreas have not been clarified yet.
- Energy metabolism and Endoplasmic Reticulum (ER) stress may be important targets.

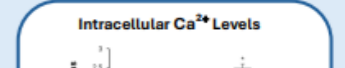

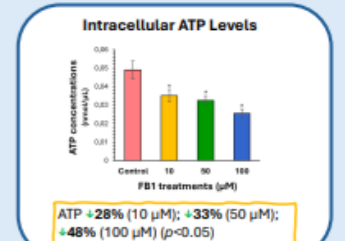

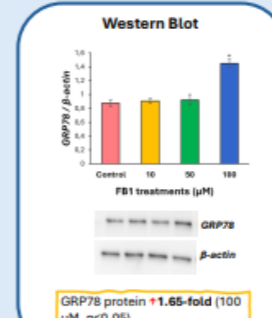

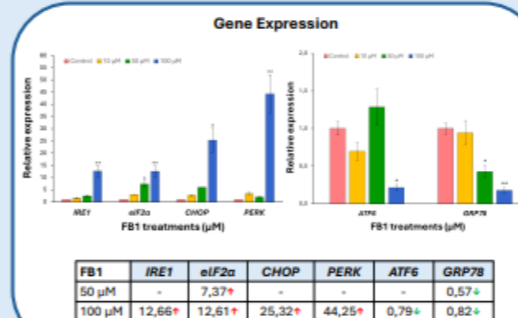

### Objectives

- Evaluate FB1 toxicity in Pancreatic Epithelioid Carcinoma Cells (PANC-1)
- Analyze ER stress-related genes/proteins
- Measure Mitochondrial Membrane Potential (MMP)
- Assess intracellular ATP and Ca<sup>2+</sup> levels
- Clarify FB1's role in energy dysfunction

### Materials & Methods

### Results

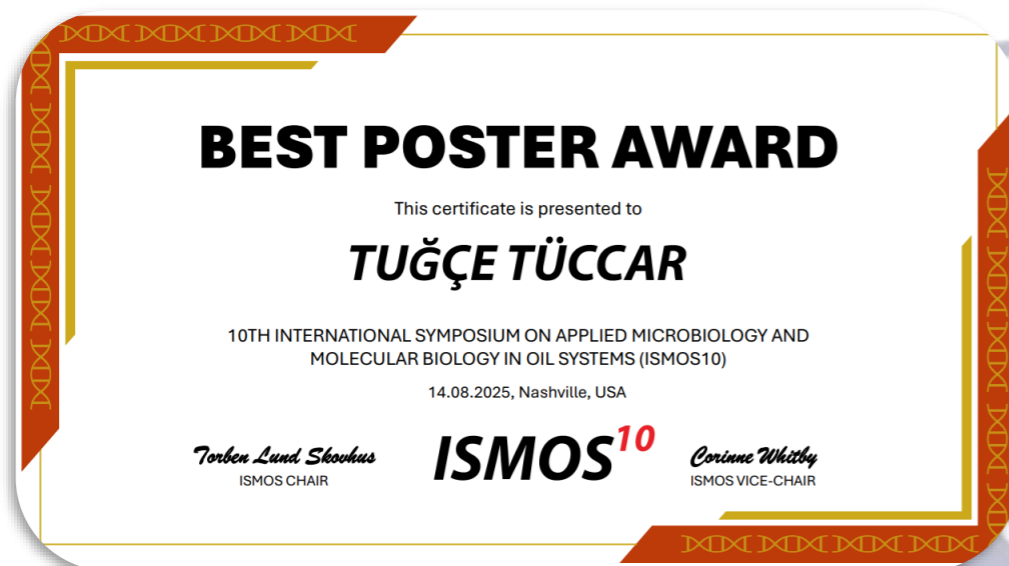

# FACULTY OF PHARMACY

**Our Faculty Member from the Department of Pharmaceutical Microbiology, Dr. Tuğçe TÜCCAR, participated in the Euro-MIC COST Action CA20130 Closing Workshop & Conference, held on September 18-19 at VIA University College, Horsens, Denmark, and delivered an oral presentation entitled "Ontology Study: Harmonizing Microbiologically Influenced Corrosion (MIC) Terminology Across Industries."**

### ISMOS<sup>10</sup> Ontology study: Harmonizing Microbiologically Influenced Corrosion (MIC) Terminology Across Industries

Tuğçe Tüccar<sup>1</sup>, Judit Knisz<sup>2</sup>, Richard Eckert<sup>3</sup>, Torben Lund Skovhus<sup>4</sup>

<sup>1</sup>Istanbul Aydın University, Faculty of Pharmacy, Department of Pharmaceutical Microbiology, Istanbul, TÜRKİYE  
<sup>2</sup>University of Public Service, Faculty of Water Sciences, Department of Water Supply and Sewerage, Baja, HUNGARY  
<sup>3</sup>Microbial Corrosion Consulting, LLC, Commerce Township, USA  
<sup>4</sup>Research Centre for Built Environment, Climate and Water Technology, VIA University College, Horsens, DENMARK

**Summary**

Microbiologically Influenced Corrosion (MIC) terminology is widely used across various industrial sectors, such as oil and gas, marine, energy production, and water treatment. However, differing definitions of MIC-related terms often lead to misunderstandings, confusion, and communication gaps among stakeholders. To bridge this gap, a standardized glossary of MIC-related terms is essential for both academic and industry professionals. In this study, we developed a comprehensive glossary to eliminate misunderstandings and promote clearer communication across sectors.

**Materials and Methods**

**1. Data collection**

- MIC-related terms were extracted from 17 internationally recognized standards, 6 online glossaries, and peer-reviewed literature across multiple industries.

**2. Data processing**

- An AI-powered tool, **ChatGPT Plus** (GPT-4o, OpenAI, 2024), was used to automatically generate and classify definitions for each MIC-related term based on their contextual relevance to microbiology, chemistry, or engineering.
- To enhance classification accuracy and ensure citation-backed reliability, we employed the **SciSpace plugin** in ChatGPT (OpenAI, 2025)—a research-focused tool developed for scientific discovery and analysis.

**3. Generation of a MIC glossary**

- A structured **MIC Glossary Table** was developed by combining manually collected MIC-related definitions with outputs from an AI tool.
- For each term, two versions of a unified definition were created:

**1. Consensus Definition**  
Generated using the Consensus plugin in ChatGPT, integrating perspectives from microbiology, chemistry, and engineering.

**2. Harmonized Definition**  
Manually developed to ensure clarity, completeness, and cross-disciplinary relevance.

**Results and Discussion**

- Most terminology in the reviewed standards and glossaries originates from chemistry, materials science, and engineering, with limited microbiology-related terms.
- The language used is often not easily understood across disciplines.
- Commonly misused terms like *SRB* (*sulfate-reducing bacteria*) and *SRP* (*sulfur-reducing prokaryotes*) are poorly defined or absent.
- Terms like *anoxic* and *anaerobic* are used interchangeably, causing confusion between engineering and microbiology contexts.
- Although terms like *bicorrosion*, *microbially influenced corrosion*, and *biological degradation/deterioration* are frequently used in scientific and technical literature in contexts closely related to MIC, none were defined in the standards examined.
- The absence of key MIC-related terms in existing standards and glossaries, along with inadequate, unclear, or inconsistent definitions, highlights the need for a more comprehensive and interdisciplinary MIC terminology resource.

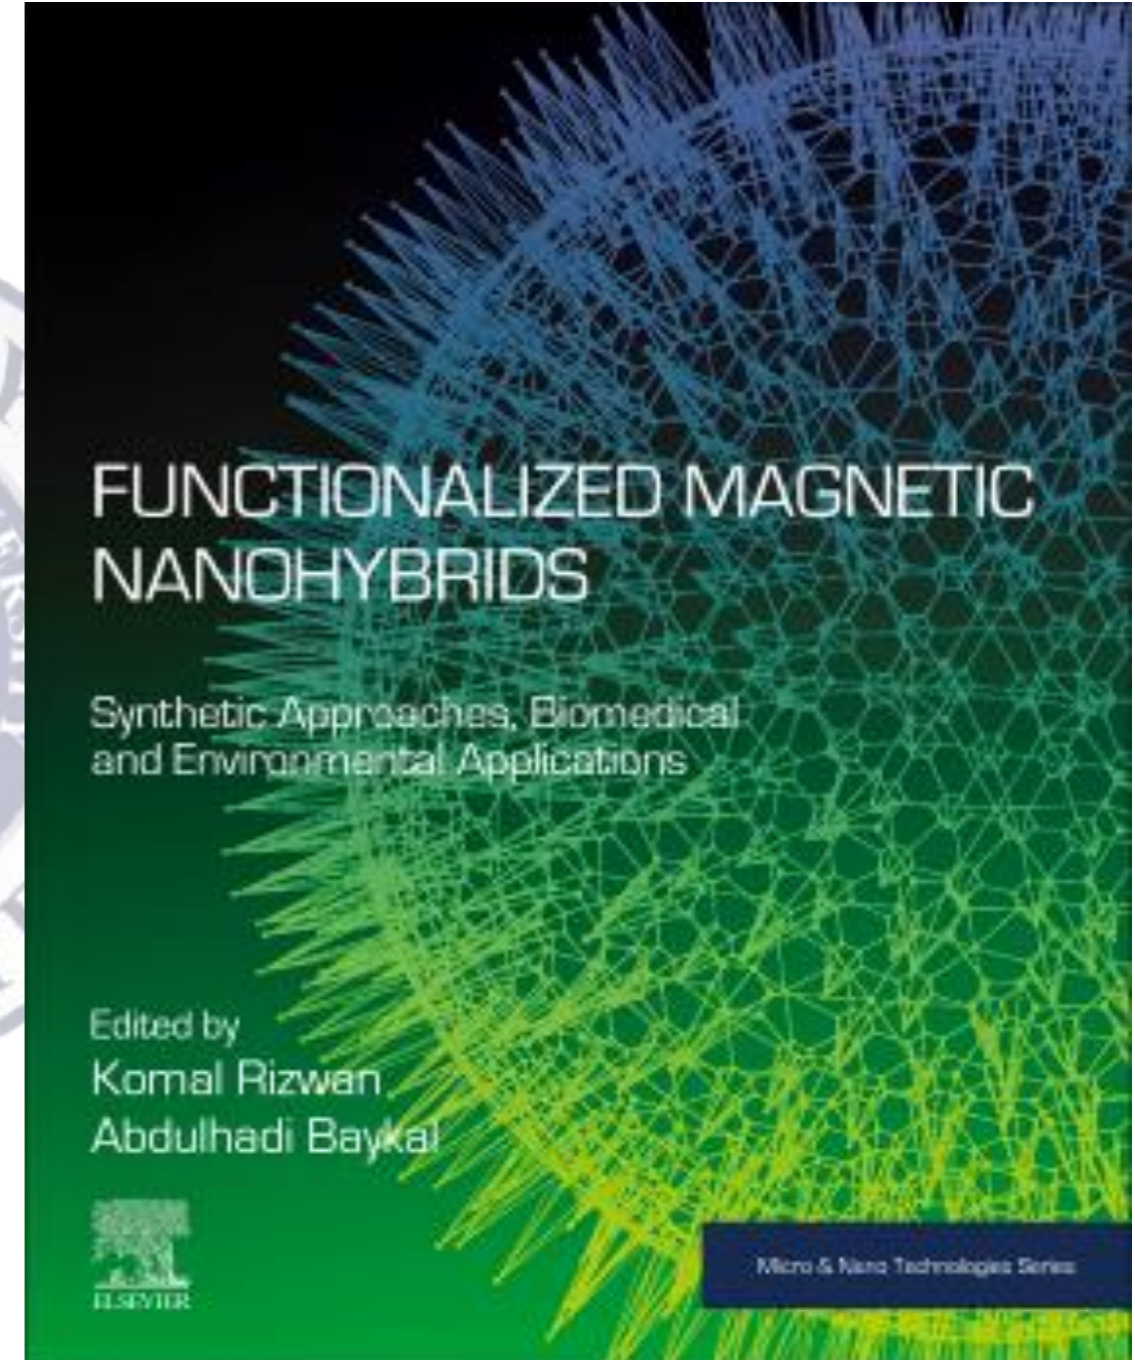

Our faculty member from the Department of Pharmaceutical Microbiology, Dr. Tuğçe TÜCCAR, participated in the ISMOS-10 congress held in Nashville, USA, with a poster presentation titled "Ontology study: Harmonizing microbiologically influenced corrosion (MIC) terminology across industries" and received the Best Poster Award.

Resorcinol  
Electrochemical sensor  
Limit of detection

**ABSTRACT**

Resorcinol (RS) is a phenolic chemical that is widely utilized in industrial applications, particularly in the manufacturing of cosmetics, insecticides, and skin care antiseptics. However, RS can be exceedingly harmful to both the environment and humans (ecotoxic). If inhaled or absorbed through the gastrointestinal tract, significant effects to the eyes, skin, mouth, and gastrointestinal processes may occur. Thus, the current study investigated the design and fabrication of a sensing interface made of glassy carbon electrode (GCE) embedded with rod-like cobalt sulfide (CS) nanostructures, followed by structural, morphological, and electrochemical characterizations. The CS/GCE demonstrated exceptional sensitivity for RS detection, with a calculated limit of detection of 8.1 nM in 0.025–0.50 µM linear range using differential pulse voltammetry. Electroanalysis of RS in spiked water samples from various sources resulted in recoveries ranging from 92.80 to 97.86%. This proposed sensing interface has the advantage of being simple to fabricate while also exhibiting promising electrochemical performance, both of which are extremely important factors for designing next-generation sensor devices for monitoring environmental contaminants.

**1. Introduction**

Chalcogenide nanoparticles have attracted substantial consideration owing to their vast applications and the significant variations in their physicochemical and optoelectronic characteristics that arise with changes in particle size [1]. Metal-based chalcogenides, particularly molybdenum sulfide, nickel sulfide, silver sulfide, vanadium sulfide, and cobalt sulfide, have remained extensively explored for their potential uses in biomedical fields, supercapacitors, lithium-ion batteries, solar cells, and as catalysts [2–4]. Metal-based chalcogenide nanoparticles can be synthesized through various methods, including microwave irradiation, co-precipitation, sublimation, hydrothermal and solvothermal techniques, sol-gel processes, and chemical vapor deposition, each offering distinct advantages in terms of particle size, morphology, and crystallinity. Moreover, the use of capping agents and surfactants enables the successful synthesis of well-dispersed and stabilized chalcogenide nanoparticles by preventing agglomeration and controlling particle growth [5,6].

Cobalt sulfide (CS), a notable subgroup of transition metal chalcogenides, exhibit multifunctional features that make them promising candidates for a variety of applications. These applications include use in electrochemical energy storage [7], photocatalysis [8], supercapacitors [9], sensing systems [10], solar cell applications [11], hydrogen production, and evolution [12], as a catalyst for hydrogen production from water [13]. Because of its variable stoichiometry, cobalt sulfide can exist in different crystal forms like CoS, Co<sub>3</sub>S<sub>4</sub>, and Co<sub>2</sub>S<sub>4</sub>. Some studies have also shown that mixed phases, such as Co<sub>3</sub>S<sub>4</sub> with CoS<sub>1.097</sub>, or combinations of CoS<sub>2</sub>, Co<sub>3</sub>S<sub>8</sub>, and CoS, can be produced [14,15]. Therefore, the synthesis method plays a critical role in determining the phase purity, morphology, crystallinity, and overall performance of CS nanostructures. Among the various available techniques, hydrothermal synthesis has gained considerable attention due to its

### TANITILIM

Dr. Cem Erkmén, 1991 doğumlu olup İstanbul Aydın Üniversitesi Eczacılık Fakültesi, Temel Eczacılık Bilimleri Bölümü Analitik Kimya Anabilim Dalı'nda Dr. Öğr. Üyesi olarak görev yapmaktadır.

Aynı zamanda fakülte bünyesinde Bölüm Başkanlığı, Fakülte Kurulu Üyeliği ve Birim Kalite Komisyonu Üyeliği görevlerini sürdürmektedir. Ayrıca, Dr. Cem Erkmén İstanbul Aydın Üniversitesi İleri Araştırmalar Uygulama ve Araştırma Merkezi'nde araştırmacı olarak görev almaktadır.

Dr. Cem Erkmén, 1991 doğumlu olup İstanbul Aydın Üniversitesi Eczacılık Fakültesi, Temel Eczacılık Bilimleri Bölümü Analitik Kimya Anabilim Dalı'nda Dr. Öğr. Üyesi olarak görev yapmaktadır.

Dr. Cem Erkmén, 1991 doğumlu olup İstanbul Aydın Üniversitesi Eczacılık Fakültesi, Temel Eczacılık Bilimleri Bölümü Analitik Kimya Anabilim Dalı'nda Dr. Öğr. Üyesi olarak görev yapmaktadır.

Dr. Erkmén, ulusal ve uluslararası kongrelerde 30'un üzerinde bildiri sunmuş, 2018'de Bükreş'te düzenlenen Uluslararası Analitik Kimya Konferansı'nda En İyi Sözlü Sunum Ödülü'nü kazanmıştır.

Ayrıca farklı dergilerde misafir editörlük yapmış, 2025 yılında Exploration of Foods and Foodomics dergisinin Genç Editör Kurulu'na seçilmiştir. Bilimsel vizyonu; farmasötik ve çevresel örneklerde hassas, seçici ve hızlı analizler için yenilikçi sensör platformları geliştirmek, bu platformları klinik ve biyomedikal uygulamalara entegre ederek topluma fayda sağlayacak teknolojiler üretmektir.

Our faculty member from the Department of Analytical Chemistry, Dr. Cem Erkmén, participated in a live broadcast on September 1st titled "Career Journey with Pharmacy Students," organized by the Faculties Pharma Platform.

**On Monday, September 8, the "Emergency Situations and Training Plan Training" was conducted in classroom M Block 9701, led by Occupational Safety Specialist Hüseyin Emre Gülbaş. Specialist Gülbaş provided detailed information on the actions to take and avoid in the event of fire, flood, and earthquake. Afterwards, an earthquake drill was carried out, and participants moved from the building to the designated assembly area on campus.**

**The Trainer Training Program was held from September 15 to 17, 2025, with intensive participation from our university's faculty members. Throughout the program, training sessions were conducted on the following topics: “Current Developments in Health and Technology Education in the 21st Century: Intergenerational Differences of Generations X, Y, Z, and Alpha,” “Developing the Educator Identity and Adult Education,” “Instructional Technologies and Generative Artificial Intelligence in Education,” “Classroom Communication and Classroom Management,” “Teaching Methods,” and “Assessment and Evaluation in Education.”**

**Prof. Dr. Belma Tuğrul, Head of the Early Childhood Education Program, visited Hatay İskenderun Special Education Secondary School (September 8–9, 2025), Malatya Turgut Özal Special Education Secondary School (September 15, 2025), Adıyaman Şehit Mehmet Kılıncı Primary School and Mehmet Akif Ersoy Primary School (September 16, 2025), and Kahramanmaraş 125th Year Special Education Primary School (September 17, 2025), where the “Healing Through Play Education” seminars—conducted in collaboration with the Ministry of National Education, UNICEF, and the LEGO Foundation—were implemented, and observed the practical training sessions on site.**

**Professor Dr. Saeed Mehrpour, a faculty member of the English Language Teaching Program, organized a workshop titled “Language Classroom Management: From Theory to Practice” for the instructors of Istanbul Aydın University Preparatory School on September 17, 2025.**

**The Fall Semester Academic Board Meeting for the 2025–26 Academic Year was held on Thursday, September 18, 2025. During the meeting, a general evaluation of the 2024–25 academic year was conducted, and many important topics were discussed, including preparations and plans for the 2025–26 academic year, quality and accreditation processes, project applications, internationalization efforts, and community service practices.**

As Istanbul Aydın University Faculty of Education, we came together with first-year students who have recently started their undergraduate programs within the scope of the 2025-2026 Academic Year Orientation Program. The program began with a moment of silence and the recitation of our National Anthem, followed by the opening speech of the Dean of the Faculty of Education, Prof. Dr. Aysel Ergül Keskin, and the “UBIS Introduction” presentation by Vice Dean Assoc. Dr. Ali Yiğit Kutluca. Information on “Student Clubs and the Student Council” was provided by Student Dean Dr. Özgül Yaman; presentations on “Zero Waste” by Lecturer Şükran Evirgen, “Community Service Practices” by Specialist Tülay Billor, and “Library Orientation” by Library Officer Emrullah Uğur were also delivered.

**The 3rd International Congress on Learning Disabilities (ÖGK 2025), organized under the coordination of the Faculty of Education and the Center for Accessible Life at Istanbul Aydın University, in collaboration with the Anatolian Education and Culture Foundation (AKEV), the Turkish Children with Dyslexia Foundation (DiSLeV), and the Dyslexia and Learning Difficulties Association, was held on October 10–12, 2025, at the Social Sciences Campus of Istanbul Aydın University.**

**Within the scope of the "Intra-Faculty Interaction and Sharing Meeting" organized by the Faculty of Education on October 3, 2025, our faculty members came together to strengthen communication within the faculty and reinforce academic solidarity.**

**Dr. Büşra Kırıl Demir from the Faculty of Education, Primary Education Mathematics Teaching Program, conducted seminars organized by the Susurluk District Directorate of National Education for mathematics teachers working in secondary schools in Susurluk district, Balıkesir province. On October 2, 2025, she gave a seminar titled “Problem Solving and Problem Posing in Mathematics Education,” and on October 3, 2025, she presented a seminar on “Teaching Algebra.”**

## Susurluk Anadolu Lisesi Mezunu Akademisyenden Eğitime Katkı

**İstanbul Aydın Üniversitesi'nden Dr. Büşra Kıral Demir, ilçemizde öğretmen ve öğrencilerle bir araya gelerek bilgi ve deneyimlerini paylaştı.**

• [DERGIPARK.ORG.TR/IAUSOS](http://DERGIPARK.ORG.TR/IAUSOS)

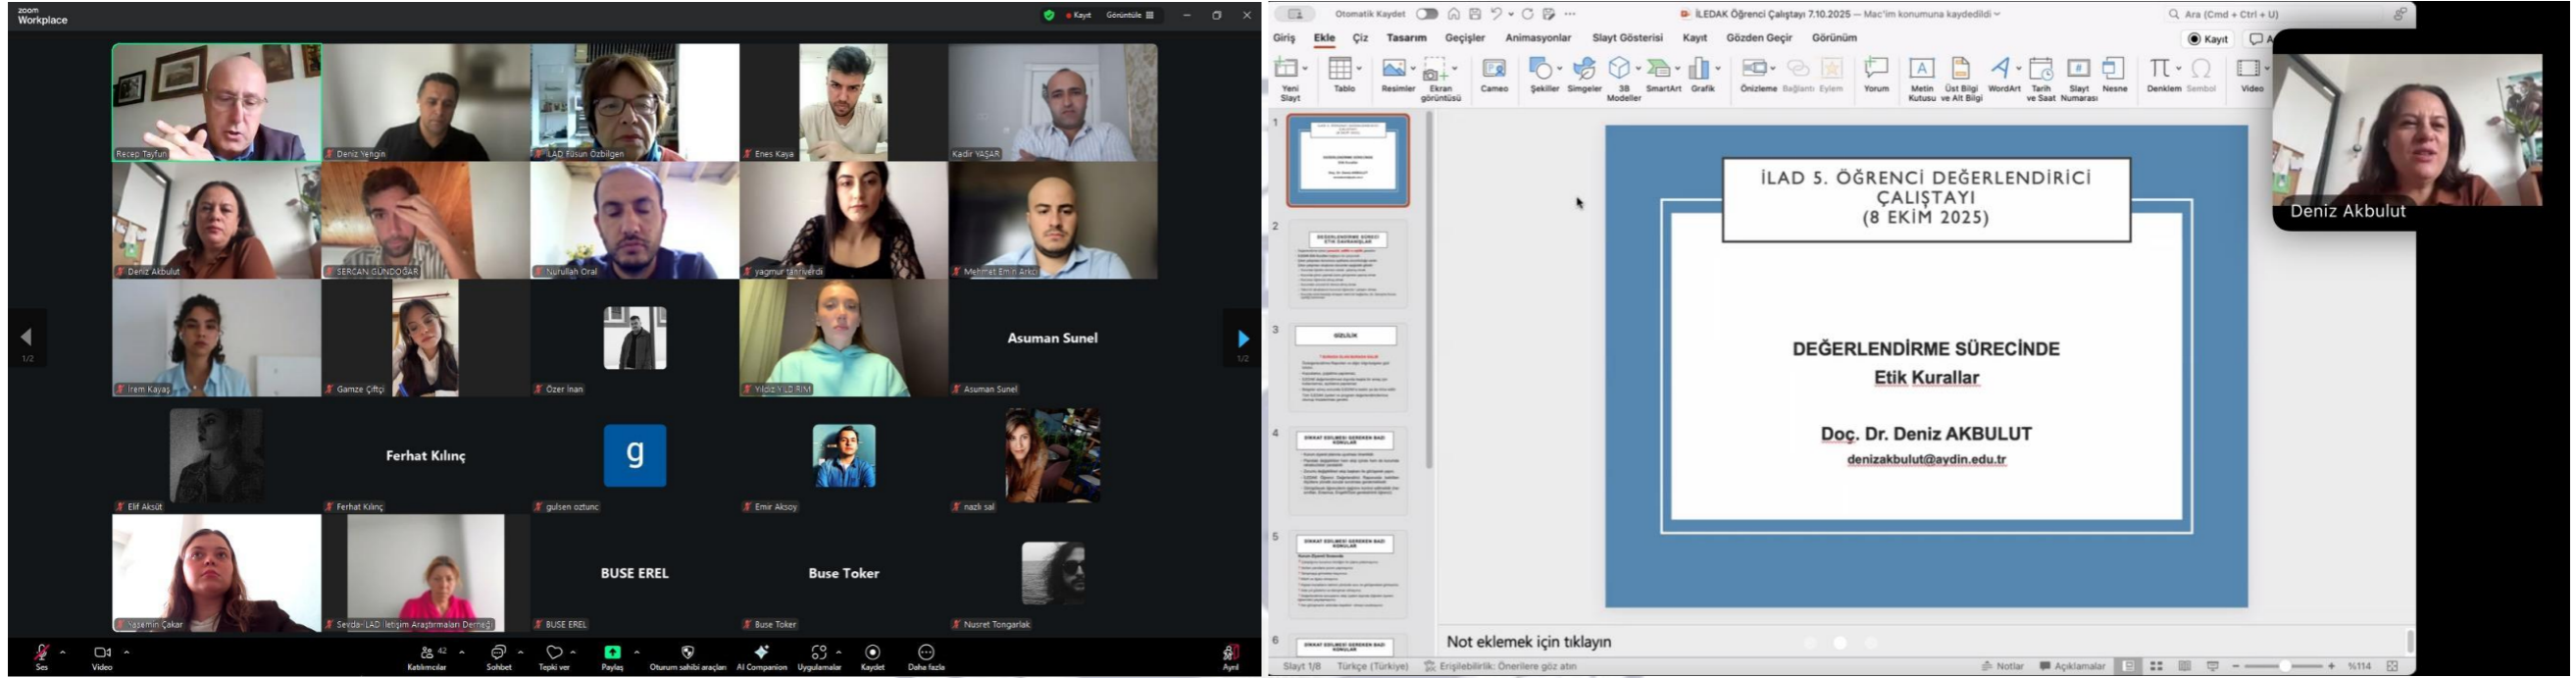

**As part of the Journalism Talks series, an event titled “Cultural and Arts Journalism: Naht Art Workshop” was held with the participation of Instructor Dilek Tezcan, Naht Artist at the Ministry of Culture and Tourism. Under the guidance of Instructor Tezcan, students experienced the process of transferring calligraphic patterns onto wooden surfaces and practicing cutting and carving techniques. The event offered an opportunity to engage with and experience our cultural heritage in a hands-on manner.**

**The IAÜ Journalism Club organized the Communication Summit with the participation of famous figures, influencers, and actors. During this two-day event, leading professionals in the industry shared their experiences and inspired students.**

**At the highly attended event, students not only gained knowledge from the experiences of industry professionals but also had the opportunity to observe the dynamics of the communication world firsthand and exchange ideas through the panels and talks held.**

At the 5th Student Evaluator Training Workshop organized by the Communication Research Association (İLAD) on October 8, our Department Chair and İLAD Education Committee Member, Assoc. Prof. Dr. Deniz Akbulut, delivered a presentation titled “Ethical Guidelines in the Evaluation Process.” In addition, Research Assistant Emir Aksoy attended the workshop and earned the right to receive a student evaluator certificate.

**Our Library's Reader Services Officer, Emrullah Uğur, attended the Introduction to Public Relations course given to first-year students by our Department Chair, Associate Professor Dr. Deniz Akbulut, as a guest speaker and informed the students about library usage and its facilities through his presentation.**

**İAÜ PR Workshop's traditional "Public Relations and Promotion Students Meet the Industry" events continue at full speed. With the contributions of @ifatolyeaydin and the Faculty of Communication Studios team, the event held at the Faculty of Communication Television Studio featured a delightful conversation on "Thought Leadership and Communication" with Ms. Elmas Nida Baykal and Mustafa Boran, together with Assoc. Prof. Dr. Deniz Akbulut.**

**As part of the “One Day a Week at University” project, Mert Başkurt was a guest in the Light and Lighting course taught by Lecturer Volkan Budak. The project, implemented through the collaboration of Istanbul Aydın University and the Anadolu Education and Culture Foundation, offers young people with special needs aged 17 and above the opportunity to experience a real university atmosphere. Participants, who attend the university only one day a week, have the chance to experience a genuine campus and classroom environment by joining the courses alongside regular students.**

**Volkan Budak, a lecturer in the Department of Radio, Television, and Cinema, participated in the filming of a documentary currently in preparation at TRT. In the documentary, Volkan Budak explained the process of the evolution of storytelling, starting from the very first sounds produced by humanity.**

# FACULTY OF COMMUNICATION

118

**Ahmet Berk Duman, Lecturer in the Department of Radio, Television, and Cinema, participated in the Apart International Short Film, Video, and Photography Symposium, held on October 24–26 with the support of the Ministry of Culture and Tourism, with a paper abstract titled “Macabre in the Microcosm: Body Politics, Anomaly, and Biopolitics in the Photography of Joel-Peter Witkin.”**

The paper titled “From the Genealogy of Imperialism to Casbah: Frantz Fanon, Gillo Pontecorvo’s The Battle of Algiers, and Joe Strummer’s The Clash,” submitted by Ahmet Berk Duman, Lecturer in the Department of Radio, Television, and Cinema, to the 5th International Communication Sciences Symposium, has been accepted for presentation at the symposium.

Sayın Ahmet Berk Duman,

5. Uluslararası İletişim Bilimleri Sempozyumu’na gönderdiğiniz “Emperyalizmin Soykütüğünden Casbah’a: Frantz Fanon, Gillo Pontecorvo’nun “Cezayir Savaşı” ve Joe Strummer’ın *The Clash*’ı” başlıklı bildiriniz, hakem değerlendirme süreci sonucunda sempozyumda sunulmak üzere **kabul edilmiştir.**

Sempozyumumuz, 30-31 Ekim 2025 tarihlerinde Sakarya Üniversitesi ev sahipliğinde gerçekleştirilecektir. Oturum bilgileri ve program detayları ilerleyen günlerde tarafınıza ayrıca iletilecektir.

Bilimsel katkınız için teşekkür eder, başarılı bir sunum dileriz.

**On Friday, October 17, a guided tour was organized by the İAÜ Advertising Workshop at the Galata Greek School, the second-largest exhibition venue of the 18th Istanbul Biennial, organized by İKSV. The tour was attended by Assoc. Prof. Dr. Gonca Yıldırım Öge, Res. Asst. Elif İnceismail, and Res. Asst. Azime Ayşenur Çelimli Akgül. Students explored the reflections of challenging themes such as war, migration, and social transformation in art during the exhibition.**

The book chapter study by Dr. İlkey Burak TAŞKIRAN from the Department of Advertising, titled “Internal Communication in the Context of Public Relations: Transparency and the Hierarchy of Effectiveness”, was included in the book *Public Relations Evaluations*, edited by Dr. Özden ÖZLÜ and published by Yaz Publications.

*Halkla İlişkiler Değerlendirmeleri*

## HALKLA İLİŞKİLER BAĞLAMINDA KURUM İÇİ İLETİŞİM: ŞEFFAFLIK VE ETKİLİLİK HİYERARŞİSİ

İlkey Burak TAŞKIRAN<sup>1</sup>

### 1. GİRİŞ

Dünyanın dört bir yanındaki kurumlar kârlılık, büyüme ve rekabet gücü elde etmek amacıyla yeni yollar aramaktadırlar. Küreselleşen serbest piyasa ekonomisinin beraberinde getirdiği baskılar göz önüne alındığında, bu oldukça zorlu bir hedef haline gelmiştir. Kurumun dışından birleşme, satın alma veya ortaklık yoluyla büyüme sağlamak için farklı yollar bulunsa da içeriden büyüme yaratmak ulaşılmaz bir hedefdir (Chmielecki, 2015, s. 25). Bu sebeple kurum içi iletişim, günümüz iş dünyasında en önemli faktörlerden biri haline gelmiştir. Welch ve Jackson (2007, s. 177) tarafından kurum içi iletişim, rekabet ortamındaki ilk cephe olarak nitelendirilmiştir.

Kurum içi iletişim kavramının yükselişi 1990'larda Amerika Birleşik Devletleri'nde başlamış ve oradan Avrupa'ya ulaşarak yeni milenyumun başında güç kazanmıştır (Verçic vd., 2012, s. 223). Günümüze gelindiğinde ise kurumsal dünyadaki rekabetin her geçen gün artması, kurum içi iletişimi bu dünyanın ayrılmaz bir parçası konumuna getirmiştir (Vora ve Patra, 2017, s. 30). Bu bağlamda kurum içi iletişimin, hedeflenen iç ve dış sonuçlara ulaşma konusunda elzem bir niteliğe sahip olduğu söylenebilir.

### Therapeutic Peptides Targeting VEGF/VEGFR: Advances in Anti-Angiogenic Therapy and the Role of Bioinformatics in Drug Design

Mohammad Mahagna<sup>1</sup> & Berrin Erdağ<sup>2</sup>

<sup>1</sup> Istanbul Aydın University, Department of Molecular Medicine, Faculty of Medicine, Istanbul, Türkiye

<sup>2</sup> Istanbul Aydın University Department of Medical Biology, Faculty of Medicine, Istanbul, Türkiye

#### Abstract

Angiogenesis is a critical process in the formation of new blood vessels in both normal and pathological tissues. In cancer, angiogenesis is important to provide oxygen and nutrients to tumour sites due to oxygen deficiency during hypoxia. Vascular endothelial growth factor (VEGF) is a key regulator that activates various signalling pathways that are critical for angiogenesis by binding to the VEGF receptor (VEGFR). Targeting the VEGF/VEGFR signalling pathway, its receptor, or ligand can inhibit signalling and cause an anti-angiogenic effect. Various approaches have been developed to target the VEGF/VEGFR signalling pathway, including the most widely used monoclonal antibodies and tyrosine kinase inhibitors. Monoclonal antibodies show high target specificity, but due to their large size, they also cause high immunogenicity. Tyrosine kinase inhibitors are effective against intracellular targets but have limited capacity to target specific sites. Therapeutic peptides offer a promising alternative because of their small size, improved target selectivity, and chemical modification potential. The use of bioinformatics tools in therapeutic peptide development is time-efficient and provides a better understanding of peptide structure and activity. Bioinformatics tools help in designing therapeutic peptides, including structural and functional analysis, interaction analysis, structural prediction, and modification method testing. In this context, several anti-angiogenic peptides have been designed and developed with the help of bioinformatics tools. Here, we review the importance of the VEGF/VEGFR complex as a target for the development of anti-angiogenic drugs. We also discuss previous studies that successfully used bioinformatics techniques to design and develop effective anti-angiogenic peptides.

**Abstract:** Beef adulteration with turkey meat is typically driven by financial motives. Since turkey meat is less expensive than beef, producers aiming to cut costs and boost profits blend turkey meat into beef products in certain ratios. This study aimed to investigate the use of fluorescence spectroscopy as a fast, non-destructive, and comprehensive method, combined with multivariate analysis, to predict meat adulteration. Raw turkey ground was combined with raw beef ground in concentrations from 0-100% (w/w) in 10% increments and then cooked. Fluorescence measurements of the cooked samples were taken (Ex 200-500 nm, Em 525 nm). The resulting spectral data were analyzed using chemometric tools, such as principal component analysis and partial least squares regression, and error metrics (Table 1 and 2) were calculated. For the training, validation, and test datasets,  $R^2$  values of 0.941, 0.922, and 0.916, and RMSE values of 8.124, 10.856, and 8.456 were identified, respectively. This research demonstrated that fluorescence spectroscopy and multivariate analyses can serve as rapid, non-destructive, and effective methods for detecting a 20% turkey meat adulteration in meat products.
