INTRODUCTION

he connection between migrant smuggling and terrorism is becoming an increasingly prominent issue in global security. There are many aspects that could require cooperation between terrorist organizations and migrant smugglers. The income generated from migrant smuggling can be used to finance the activities of terrorist groups. Many irregular migrants, including women, men, and children, can be targeted by terrorist groups as potential new recruits.

Özet

Enerji sorunu, küresel boyutta artan iklim ve ekoloji krizleri; bina tasarımında ekolojik yaklaşımlar sürdürülebilirlik, enerji etkin tasarım gibi konuları öne çıkarmıştır. Enerji etkin bina tasarımı, binanın ömrü boyunca en az enerji tüketimini, enerji korunumunu, yenilebilir enerji kaynaklarının kullanımını ve çevreye duyarlı binaları amaçlamaktadır. Ofis binaları, enerji tüketimi yüksek yapı tiplerinden biridir. Bina iç ve dış ortamları arasında ayırıcı görevi olan cepheler, yapı teknolojisinin ilerlemesiyle bina içi konfor koşullarının en az enerji tüketimiyle sağlanmasına katkıda bulunan, değişen iklim koşullarına uyum sağlayabilen aktif bilesenler haline gelmektedir. Bu calısmada, ofis binaları cephelerinde en cok uvgulanan aktif cephe cözümleri ve yenîlenebilir enerji üretiminde kullanılan bileşenlerin cepheye entegre olduğu cephe sistemleri incelenmiştir. Farklı cephe sistem çözümlerinin enerji etkin tasarımdaki potansiyelinin ve yenilikçi yaklaşımların etkisinin görülmesi amaçlanmıştır. Bu cephe çözümlerinin bir veya birkaçının kullanıldığı dört örnek bina incelenmiş ve cephe tasarım kararlarının önceliklerinin enerji tüketimi, ısıl konfor ve görsel konfor olduğu görülmüştür

Anahtar Kelimeler: Akıllı cepheler, Enerji etkin cephe tasarımı, Ofis binası cepheleri

Abstract

Energy problem and increasing global climate and ecological crises have highlighted issues such as ecological approaches in building design, sustainability and energy efficient design. Energy efficient building design aims to minimize energy consumption, energy conservation, use of renewable energy resources throughout the life of the building and environmentally friendly buildings. Office buildings are one of the building types with high energy consumption. Facades, which separate the interior and exterior of the building, with the advancement of building technology, are becoming active components that can adapt to changing climatic conditions and contribute to the provision of indoor comfort conditions with minimum energy consumption. In this study, it is aimed to see the potential of different facade system solutions in energy efficient design and the effect of innovative approaches by examining the active facade solutions most commonly applied on office building facades and the facade systems in which components used in renewable energy production are integrated into the facade. Four sample buildings where one or more of these facade solutions were used were examined and it was seen that the priorities of facade decisions were energy consumption, thermal comfort

Keywords: Intelligent facades, Energy-efficient facade design, Office building facades

Ikinci el telefonlarda Artan yaşam maliyetleriyle birlikte, akıllı telefon pazarında yenilenmiş ve ikinci

el ürünlere olan talep hızla artıyor... Ancak bu seçenekler arasında gizli tehlikeler de bulunuyor. Peki, nelere dikkat edilmeli? Kullanıcıları hangi tehlikeler bekliyor?

Son yıllarda yaşam maliyetlerindeki yükselme, tüketicilerin alışveriş alış-kanlıklarını köklü bir şekilde değiştirdi. Özellikle akıllı telefon pazarında, yeni cihazların fiyatlarının yüksekliği karşısında birçok kişi, daha uygun fiyatlı alternatiflere yöneliyor. Bu noktada, yenilenmiş ve ikinci el akıllı telefon-lar, çazip fiyatlarla karsımıza çıkıyor. Uzmanlar bu tür ürünlerin alımında dikkat edilmesi gereken bazı önemli noktaların altını çiziyor. Aydın Üniversitesi İletişim Direktoru

Bilişim ve Sosyal Medya Üzmanı Ümit Sanlav, son dönemde artan bu talebin beraberinde getirdiği riskleri ve tüketi-cilerin nelere dikkat etmesi gerektiğini

SON SAAT Gazetesi için değerlendirdi. Son dönemde yenilenmiş ve ikinci el telefonlara olan ilgi artmış durumda. Tüketiciler neden bu tercihi yapıyor?

Yaşam maliyetlerinin yükselmesi v ekonomik zorluklar, tüketicileri daha uygun fiyatlı alternatiflere yönlendi-riyor. Özellikle akıllı telefonlar, artık neredeyse her kesim için temel bir ihti-yaç haline geldi. Yenilenmiş ve ikinci el telefonlar, markaların orijinal fiyatları-na göre daha uygun fiyatlar sunuyor.

Peki. ikinci el ve yenilenmiş tele-fon alırken nelere dikkat edilmeli?

İkinci el ve yenilenmiş telefon almak, maddi olarak avantajlı olabi lir ancak ciddi riskler de taşıyor. İlk olarak cihazın tamir edilip edilmediği ve hangi parçaların değiştirildiği gibi bilgiler, mutlaka sorgulanmalı. Yenilenmiş telefonlar genellikle orijinal parça-larla donatılmıyor, bu yüzden kaliteyi kontrol etmek önemli. Ayrıca, cihazın batarya durumu da göz önünde bulundurulmalı. Batarya ömrü, bir telefonun uzun vadeli kullanımını doğrudan et-kileyen en önemli faktörlerden biridir. Mutlaka fabrika ayarlarına sıfırlama yapmalı ve telefonu en güncel işletim sistemi sürümüne yükseltmelisiniz Yine, garanti süresi de büyük bir önem taşır. Garanti belgesinin ve fatura bilgileri ile satıcıdan cihazın yasal so-rumluluğunu doğrulamak gerekir.
