Istanbul Aydın University has once again achieved the distinction of being the “University with the Highest Number of Approved Projects” among foundation universities, with 11 of its projects approved within the scope of ÜNİDES. This outcome, stemming from its strong belief in a research ecosystem, a technology-oriented educational vision, and a student-centered approach, has concretized its vision of sustained success.

The first International Medical Student Congress with international participation, organized by the Faculty of Medicine as part of March 14 Medicine Day, was held. At the congress, which took place with a focus on science and sharing, young physician candidates came together to exchange knowledge and shared their ideas about the future of medicine. This valuable event, which crowned the meaning and significance of March 14 with a scientific gathering, became an important platform contributing to the professional development of young physicians.

Hedonic motivation

This study investigates the factors influencing pre-service mathematics teachers' intentions to integrate coding into their instructional practices, using the Unified Theory of Acceptance and Use of Technology (UTAUT) as its theoretical foundation. While coding is widely recognized as a crucial digital competency, its effective integration into mathematics education depends on various motivational and contextual variables. The study was conducted with 334 pre-service mathematics teachers from seven universities in Turkey. Data were collected using the Coding Usage Intention Scale, developed based on the UTAUT model and extended with additional variables: self-efficacy, perceived learning opportunities, and hedonic motivation. Structural Equation Modeling (SEM) was employed to test the proposed model. The results revealed that hedonic motivation was the most significant predictor of coding intention ($\beta = 0.646, p < .001$). Other significant predictors included performance expectancy, social influence, self-efficacy, and perceived learning opportunities. In contrast, effort expectancy and facilitating conditions did not have statistically significant effects. The overall model demonstrated good fit indices, supporting the validity of the proposed framework. These findings highlight the importance of both cognitive and affective factors in shaping pre-service teachers' willingness to adopt coding in education. The study offers theoretical and practical implications for teacher education programs, suggesting that increasing enjoyment, competence, and pedagogical awareness around coding may enhance its adoption in mathematics instruction.

Prof. Dr. Belma Tuğrul, Head of the Early Childhood Education Program at the Faculty of Education, attended the "Six Bricks Sondela Conference" held in South Africa from March 1 to 7, 2026, which focused on play-based approaches in learning processes. At the conference, which brought together educators, practitioners, and supporters of the process, knowledge and experiences were shared on strengthening learning communities and how learning through play can be used more effectively in educational settings.

Students from Büyükçekmece BİL College Kindergarten visited Istanbul Aydın University on March 10, 2026. During the visit, organized under the coordination of the Child Education Practice and Research Center, workshops prepared in collaboration with the Vitamino Club, Preschool Education Club, Special Education Club, and Mind-Intelligence Games Club were conducted. The students participated in play-based exploration activities at thematic booths and experience stations. As part of the visit, a LEGO workshop was also held under the guidance of Prof. Dr. Belma Tuğrul, Head of the Preschool Teaching Program. During the workshop, students developed creative designs using LEGO materials, enhancing their problem-solving, collaboration, and productive thinking skills through play-based activities.

Play as a pathway to inclusion: preschool children’s understandings of difference and social acceptance in Turkey

Tringa Shpendi Şirin ^a and Emine Ahmetoğlu ^b

^aDepartment of Special Education, Istanbul Aydın University, Istanbul, Turkey; ^bDepartment of Early Childhood Education, Trakya University, Edirne, Turkey

ABSTRACT

This study examined preschool children’s social acceptance and attitudes towards peers with special needs, with attention to the influence of gender, inclusive classroom experiences, and having a family member with special needs. An explanatory sequential mixed-methods design was used. In the quantitative phase, data were collected from 79 typically developing children in inclusive preschool settings using the Turkish adaptation of the Acceptance Scale for Kindergarten–Revised (ASK-R), and descriptive and inferential statistics (independent samples t-tests, effect sizes, and 95% confidence intervals) were calculated. In the qualitative phase, semi-structured individual interviews were conducted and analysed through inductive thematic analysis. Quantitative results showed high levels of social acceptance overall, with significantly higher scores among children who had a peer or family member with special needs, and no significant gender differences. Qualitative findings yielded three interconnected themes – Being Friends, Playing Games, and Helping – illustrating children’s empathy, cooperative play, and prosocial support. Integrated results demonstrate that early exposure to peers with special needs fosters positive attitudes through everyday social interactions, underscoring the developmental importance of inclusive learning environments. Implications for practice include strengthening teacher preparation for inclusive education, engaging families in awareness-building efforts, and providing structured opportunities for interaction that support children’s social acceptance.

Research Assistant Sedat ARI from Istanbul Aydın University's Department of Software Engineering held an introductory seminar on the software engineering profession with students as part of the "Academy Days" event organized by Özel Sultan Fatih Educational Institutions. During the event, which took place on February 17, 2026, the role of software engineering in today's technological transformation, software development processes, and the knowledge and skills necessary for students planning a career in this field were discussed. In the question-and-answer session at the end of the seminar, students' inquiries about the profession were addressed. The event provided an important academic platform for strengthening university-school collaboration and raising awareness among students about technology-focused careers.

Within the scope of the "Vefa Meetings" conducted in collaboration with Istanbul Aydın University and AKEV, students from the Department of Physiotherapy and Rehabilitation and the Head of the Department, Asst. Prof. Demet Biçki, visited the Zeytinburnu Samiha Şakir Nursing Home. During the visit, physiotherapy applications were carried out for the residents of the nursing home, providing students with the opportunity to gain professional experience.

As part of the Mental Health and Psychiatric Nursing course, students began their clinical practice at Bakırköy Prof. Dr. Mazhar Osman Mental Health and Neurological Diseases Training and Research Hospital under the supervision of Dr. Tuğba Şahin Tokatlıoğlu.

At the stand event held in the main campus garden of Istanbul Aydın University, activities were carried out to raise health awareness by engaging with students. During the event, participants' blood pressure was measured, oxygen saturation levels were evaluated, and height and weight measurements were taken to calculate BMI. Additionally, information was provided on the importance of vital signs and health monitoring in daily life, and informational brochures prepared for this purpose were shared with the participants.

The Department of Social Work conducted an institutional visit to the Fatih Social Service Center as part of the "Review in Social Work Fields" course.

The Social Work Department conducted an institutional visit to the Bakırköy District Health Directorate as part of the Field Study course in Social Work.
