

References / Bibliography Harvard Style

Referencing with Harvard

When writing assignments you must acknowledge the source of your ideas and quotes in sufficient detail so that those reading can locate the item. Referencing is important to avoid plagiarism, to verify quotations and to enable readers to follow up what you have written and locate the cited author's work. The "Harvard style" is a generic author-date style for citing and referencing information used. There are many styles which follow the author-date convention, including the American Psychological Association (APA) and the Chicago Manual of Style. This guide is based on an Australian style manual (AGPS style) now revised by Snooks & Co, 2002.

Note: Before you create your list of references, check with your lecturer or tutor for the bibliographic style preferred by the School.

Keep in Mind the Following Points:

- Write down all the citation details of a source as you use it.
- Place quotation marks "" around a direct quote and include page number(s) when quoting directly.
- Insert brief citations at the appropriate places in the text of your document.
- Compile a reference list at the end of the document that includes full details of all references cited

In-text Citations:

- In an author-date style, in-text citations usually require the name of the author(s) and the year of publication.
- A page number is included if you have a direct quote, paraphrase a passage or you want to direct the reader to a specific page. Page numbers may also be included if you are referring to a long work and the page numbers might be useful to the reader

How to Create a Reference List/Bibliography

• A reference list contains only the books, articles, and web pages etc that are cited in the text of the document. A bibliography includes all sources consulted for background or further reading.

A reference list is arranged alphabetically by author. If an item has no author, it is cited by title, and included in the alphabetical list using the first significant word of the title.

• If you have more than one item with the same author, list the items chronologically, starting with the earliest publication.

17. DIRECT QUOTATION

- A direct quotation reproduces word-for-word material directly quoted from another author's work, or from your own previously-published work. If the quotation is **fewer than 40 words**, incorporate it into your paragraph and enclose the quotation in double
- quotation marks.
- If the quotation comprises **40 or more words**, display it in an indented, freestanding block of text, without quotation marks. At the end of a block quotation, cite the quoted source and the page number in parentheses, after the final punctuation mark.
- If you have directly quoted words from a source (in inverted commas, or in an indented paragraph), provide the author, year, and specific **page number** for that quotation. (For material without page numbers, give the paragraph number.) Include a complete reference in the reference list.
