National Security and Earthquake Conference

The earthquakes that occurred 4.5 (Mw) on September 24, 2019 and 5.8 (Mw) on September 24, 2019 in Silivri off the Marmara Sea, once again brought up discussions on the effects of an earthquake in Istanbul. There are important opinions that an earthquake of magnitude to occur in Istanbul, one of the most important cities in the world with its population, contribution to the country's economy and cultural values, will be national security.

As Disaster Training Application and Research Center (AFAM), this issue was evaluated with a conference on October 16, 2019. To this conference organized in cooperation with National Security and Strategy Application and Research Center (USAM), which continues its studies within our university, USAM director Assoc. Prof. Şevket Ayaz and Yıldız Technical University Natural Sciences Research Center President Prof. Dr. The moderator of the conference, which Şükrü Ersoy attended as a speaker, was AFAM coordinator Serhat Yılmaz. At the conference, where Prof. Dr. Şükrü Ersoy shared all the details of the expected Istanbul earthquake and a possible tsunami danger, Assoc. Prof. Şevket Ayaz talked about the dangers of earthquakes in terms of national security, and AFAM Coordinator Serhat Yılmaz informed about the basic principles of disaster mitigation to participants.

Basic Disaster Awareness Trainings Continue

As Istanbul Aydın University Disaster Training Application and Research Center, we continue to inform in October 2019 with the 'Basic Disaster Awareness Trainings' that we have been continuing with our Corporate Social Responsibility studies since 2013. We informed nearly four thousand individuals about disasters with the trainings we provided for the students and staff of Kemberburgaz Okyanus College, Halkalı Doğa College, Başakşehir Doğa College, Yıldız Technical University, Fatih Okyanus College and Fatih Sınav College.

26 September 2019 Earthquake

The fact that there was a 5.8 (Mw) earthquake in the same area 2 days after the 4.5 (Mw) earthquake that occurred off Silivri on September 24, 2019 in the Marmara Sea caused some buildings to be damaged and many people were injured. The earthquake in Istanbul naturally caused great anxiety. For this reason, as AFAM, we have provided information through various television channels to inform the public correctly after this earthquake, but also to raise awareness of disasters.
