## Basic Disaster Awareness Trainings Continue

As Istanbul Aydın University Disaster Training Application and Research Center (AFAM), we continue the Basic Disaster Awareness Trainings we carry out within the scope of our corporate social responsibility in January 2020.

We continued our trainings with Sağmalcılar Anatolian High School on January 3, 2020 and Sefaköy Anatolian High School on January 13, 2020, especially in order to raise disaster awareness at an early age and to increase social capacity against disasters.

In January 2020, we reminded our approximately 2,500 students and teachers what their individual responsibilities will be regarding disasters and how they can protect themselves, their families and their environment against disasters.
