Digital Diseases
Book
Karadağ, G.H. |
Istanbul Aydın University, Department of New Media and Communication, Turkey

Abstract
Digital development not only marked today's world in terms of technology, but also transformed our social life into different forms, and thus created our world problems in different media. With the development of technology, one of the many aspects of the digital representation that penetrates all areas of life is created by new technology's impacts on human health and behavior. Digital technology that penetrates all areas of life has some impacts on human health and behavior. Some of them are due to virtual reality, and some are due to existence of new media. These include the following diseases such as cyber disease, digital addiction, binge watching, rage surfing, and many more. The book tackles the above-mentioned diseases specifically and includes a wide spectrum of both literature reviews and original studies regarding the diseases of the digital era for a better comprehension of today's world. The studies help to deal with these diseases and develop effective interventions against them. © Peter Lang GmbH, Internationalizing Swiss Scholarship, Berlin 2020. All rights reserved.

Atf	Esen, R. ve Yengin, D. (2021) Yeni Medya Bağlılığında Photolurking Sonucu Ortaya Çıkan Dijital Şiddet Üzerine Bir İnceleme, Yeni Medya Elektronik Dergisi, 5 (2), 156-171
-----	---

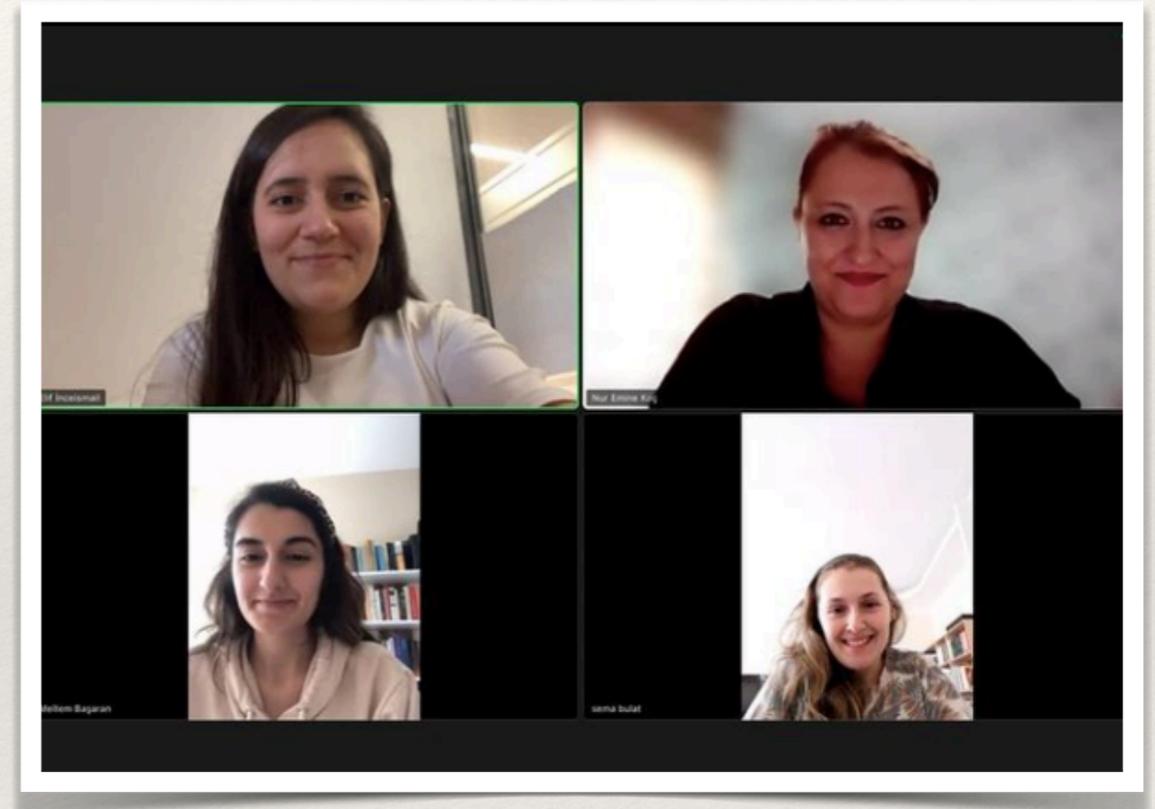

ÖZ
Teknolojinin gelişmesiyle birlikte geleneksel medyanın yerini artık yeni medyaya bıraktığı bir döneme geçilmiştir. Yeni medya toplumunda iletişim, yayılım ve etkileşim kaçınılmaz bir hızla sahip olmuştur. Bireyleri tamamen kendine bağımlı bir hale getiren yeni medya insanı tüm hazları da içerisinde barındırmaktadır. Sosyal medyanın bu denli bağımlı bir şekilde kullanılmasıyla davranışsal bozukluklar ortaya çıkmıştır. Bir dijital hastalık olan photolurking, internette saatlerce fotoğraflara bakma anlamı taşımaktadır. Bu hastalık bağlamında birey haz duyduğu şeyden artık doyum alamamakta ve ortaya dijital şiddet çıkmaktadır. Şiddeti uygulayan birey kendi içerisinde bir haz duygusu yaşarken şiddete maruz kalan sosyal medya kullanıcıları psikolojik yönden etkilenebilmektedir. Yapılan bu çalışmada teknolojik bir hastalık olan photolurking incelenerek ortaya çıkan dijital şiddetin çözümü yapılabilecektir. Örneklem olarak yapılan araştırmalar sonucu dijital şiddete en fazla maruz kalan influencer Duygu Özasan'ın, sosyal medya uygulaması olan Instagram üzerinden yaptığı paylaşımları incelenecektir. Kullanımlar ve doyumlar kuramı bağlamında içerik analizi yöntemi ile çalışma yapılacaktır.

Anahtar Kelimeler: Yeni medya bağımlılığı, Photolurking, Dijital şiddet.

Activities

BAP Project Meeting was held (26.04.2021)

The meeting of the BAP project titled Measurement of Physiological Effects of the Traditional to Digital Game Playing Habit: EPOC X and EEG: Analysis of Waves, prepared by the New Media Application and Research Center, was moderated by Asst. Prof. Dr. Nur Emine KOÇ, Vice Head of New Media and Communication Department.
